A SEMI-WEEKLY NEWSPAPER.—SUCCESSOR TO THE WEEKLY LANTERN.—ESTABLISHED, 1879.

VOL. XIII.

THE NEW BUILDINGS.

PROGRESS MADE ON THEM DURING SUMMER VACATION.

The two finest buildings on the campus are rapidly approaching completion. Hayes Hall and Orton Hall have assumed since last June such definite proportions that they practically show all the details represented in the two cuts represented in this issue. While the illustrations give a general idea of the appearance of each building, they fall far short of

shops, designing and drawing room, museum, lecture rooms, rooms for department of domestic economy (cooking, sewing, etc.) besides laboratories, wheel rooms, closets, etc.

It will be the best arranged and best equipped manual training building in the West, the contract price of the building being \$51,606, not including its equipment.

It has always been a favorite idea of ex-President Hayes, and the execution of his plan will be a source of pride and profit to the University. Director Thurston, of Cornell, who delivered the

which is the finest in the State, and the growing library of the University. As the building is to be fire proof, the fact that it is to harbor such valuable collections, is one that gives great satisfaction to everybody.

One of the things that will draw attention to this building which is nearly ready for the roof, will be the varieties of stone used in its construction. The foundation is of Columbus limestone, and the range work of Dayton limestone and Springfield buff limestone. The superstructure is built of Amherst stone trimmed with Hocking Valley brown stone. The interior of the hall in the Geological Museum is intended to represent the various building stones in Ohio, and in furtherance of this idea, many of the quarries in the state have been asked to furnish donations of stone for this interior.

A number of the large quarry owners of the State have gladly donated the few samples asked of them, and it is hoped that others will respond as freely and as promptly. The advantage of having quarries represented in such a building as this is too evident to need further emphasis than the mere suggestion of the idea.

In all cases where the specimens are donated, or where handsome concessions in price are made where an unusual number is required, the name of the quarry and of the donors will be placed on a scroll in the hall as a permanent record. Selections have already been made of between thirty and forty different varieties of building stone, but not all of these have been donated. The ceiling is arched, and there will be twenty-five columns around the sides and ends of the hall formed of these stones, ranged to show the contrast of colors and the best effect of such groupings. The floor will be of Ohio tile, and the whole building will be one to fill with pride every loyal citizen of this magnificent State of Ohio.

ALUMNI ECHOES.

Carl Doney, '91, will take up the study of law at O. S. U. Law School.

"Capt." Carl who used to marshall the forces of O. S. U. on the campus, organized a company of the Ohio National Guard at Findlay recently, was elected captain and produced a body of soldiers at the last encampment of the O. N. G. which won admiration and victories at the competitive drills in true O. S. U. style.

Moodie, '90, has become Hartwell, '88.

W. T. Morrey has left his place in the Eighth Avenue School of Columbus, to fill a professorship at Stevens' Institute, Hoboken, N. J.

Whitacre, '91, returns to Columbia Medical College.

J. A. Wilgus, '88, Kiesewetter, '91, and F. S. Kershaw, '91, will be at Harvard this year.

The total membership of Greek letter societies in the American colleges is estimated at 77,000.

The new President of the University of Wisconsin, Dr. Charles K. Adams, who made his name as assistant professor of history at Ann Arbor, will receive a salary of \$7,000.

ORTON HALL.

showing the harmony of the different materials of construction and the finer details of the architecture that add completeness and lifelikeness to the structures.

Hayes Hall, which stands east of the Chemical Building and west of the President's residence is almost finished, the large, well lighted drawing room on the third floor being ready for occupancy this week, in order to relieve this crowded department. The entire work will be over probably by November, and the departments in it will be fitted up for the winter term.

Hayes Hall is of a rather peculiar style of architecture. The main part of the building is of the finest Findlay pressed brick, but a large portion of the front is of stone. The foundation for several feet up is of dark brown stone as well as the magnificent arch over the entrance. The arch is over five feet deep, the inner circle of stones being beautifully carved. The first story is of light brown stone and is covered at the second story by a checker work of bright red and buff sandstone, extending clear across the front. This is one of the most striking features of the building. The next two

HAYES HALL.

stories are of pressed brick, with different columnar work between the windows. The main or front portion of the building is 167 x 51 feet in ground area, the central portion 88 x 51, three stories high, the lateral wings 39 x 51, two stories high, and the rear wing 36 x 86 feet. Adjoining the rear wing on the east are two other one-story wings 36 x 48. The building contains a foundry, forge-room, carpenter and machine

shops, designing and drawing room, museum, lecture rooms, rooms for department of domestic economy (cooking, sewing, etc.) besides laboratories, wheel rooms, closets, etc.

which is the finest in the State, and the growing library of the University. As the building is to be fire proof, the fact that it is to harbor such valuable collections, is one that gives great satisfaction to everybody.

One of the things that will draw attention to this building which is nearly ready for the roof, will be the varieties of stone used in its construction. No. 1.

LANDING PLACES WEDDING BELLS.

TWO O. S. U. GIRLS MARRIED.

Mr. Arthur Hartwell, '87, and Miss Alice H. Moodie, '90, were married at the home of the bride, Indianapolis Place, Wednesday noon, September 7. The guests were limited to relatives and a few intimate friends, among whom, formerly of the O. S. U. were Mr. and Mrs. J. P. Milligan, (nee Clara Fisher) Miss Hughes, Miss Basteries, Mrs. Nichols, (nee Fannie Bancroft) Mr. J. C. Hull and C. F. Scott.

The ceremony was performed by Dr. Gladden. Since his graduation, Mr. Hartwell has been connected with the Westinghouse Electric Company, where he now holds a responsible position. Miss Moodie has been teaching in the Circleville High School. They are widely known among the students of recent years, who join in wishing them a long and happy life. The young couple left Columbus amid profuse tokens of rice and old shoes from their festive friends for an Eastern trip, after which they will settle on Walnut Street, in the eastern suburbs of Pittsburgh.

Percy Martin is at Lynn, Mass., with the Thomson Electric Co.

Pearl Jones and Paul Lincoln are with the Brush Electric Co., of Cleveland.

Platt Evans, G. E. Johnson, Goddard and Steinbaugh have been on the engineering corps of a new railroad which is to run from Columbus to Milwaukee via Lima, Ohio.

Frank Eldridge is with the firm of Moore & Oates, Merchants Tailors, this city.

Sherman Guss has gone to Clarksburg, Virginia, to take the place of principal in the public schools.

I. L. Dungan, the "Tall Sycamore of the Wabash," will teach school in Texas this winter, so they say.

Will Evans is a chemist in the employ of the great American Encaustic Tiling Works at Zanesville.

Miss Houston expects to sail for Ireland this fall, and spend the winter on the Green Island with her mother.

Baker, who graduated in the Long Agricultural Course, is following his chosen profession at home on the farm.

Stump is managing the University Farm.

Miss Talbot will give private Latin lessons in the city.

Miss Wright has accepted a place as teacher in a Chicago college.

Miss Claypoole, who was in Boston perfecting herself in the Delsarte System this summer, will take advanced work at O. S. U. this fall.

Miss Robinson is the wife of Rev. George Roe, residing at Waterville, Minn.

"Bobbie" Hassler is with the Westinghouse Electric Co., at Pittsburgh.

The new buildings of the Clio-sophic and American Whig Societies of Princeton were dedicated last commencement. The former society was organized by Oliver Ellsworth, William Patterson and Luther Martin in 1765; and the latter in the same year by James Madison. The work of the organizations is mainly literary. The new buildings which have cost \$50,000 were begun in 1890.

Two-thirds of Yale's graduating class were protectionists.

The revenues of Oxford and Cambridge Universities represented a capital of about seventy-five million dollars.

President Chamberlain, of Wisconsin University, having accepted the head of the Scientific Department in Chicago University in order to devote his time more thoroughly to geology, Ex-President Charles K. Adams of Cornell has been chosen to fill his place.

Dr. Scott and Capt. Cope think there will be in the neighborhood of 800 students this year.

LANDING PLACES WEDDING BELLS.

WHERE THE COMMENCEMENT BARKS OF '92 HAVE ANCHORED.

Crooks is assistant principal of the Pomeroy High School.

Jim Tomlinson is a draughtsman at the Columbus Bridge Co.'s works.

Chas. Kershaw is with the Columbus Bolt Works.

Goodell is working for the King Bridge Co. of Cleveland.

Ernest Evans is doing chemical analysis for a Steubenville Iron Co.

Flynn is with Supt. Mendenhall on the Geodetic Survey at Washington.

Percy Martin is at Lynn, Mass., with the Thomson Houston Electric Co.

Pearl Jones and Paul Lincoln are with the Brush Electric Co., of Cleveland.

Platt Evans, G. E. Johnson, Goddard and Steinbaugh have been on the engineering corps of a new railroad which is to run from Columbus to Milwaukee via Lima, Ohio.

Frank Eldridge is with the firm of Moore & Oates, Merchants Tailors, this city.

Sherman Guss has gone to Clarksburg, Virginia, to take the place of principal in the public schools.

I. L. Johnson is doing technical work for the Thomson Houston Street Railway Co. of Cincinnati.

I. L. Dungan, the "Tall Sycamore of the Wabash," will teach school in Texas this winter, so they say.

Will Evans is a chemist in the employ of the great American Encaustic Tiling Works at Zanesville.

Miss Houston expects to sail for Ireland this fall, and spend the winter on the Green Island with her mother.

Baker, who graduated in the Long Agricultural Course, is following his chosen profession at home on the farm.

Stump is managing the University Farm.

Miss Talbot will give private Latin lessons in the city.

The new buildings which have cost \$50,000 were begun in 1890.

TWO O. S. U. GIRLS MARRIED.

Mr. Arthur Hartwell, '87, and Miss Alice H. Moodie, '90, were married at the home of the bride, Indianola Place, Wednesday noon, September 7. The guests were limited to relations and a few intimate friends, among whom, formerly of the O. S. U., were Mr. and Mrs. J. P. Milligan, (nee Clara Fisher) Miss Hughes, Miss Basterdes, Mrs. Nichols, (nee Fannie Bancroft) Mr. J. C. Hull and C. F. Scott.

The ceremony was performed by Dr. Gladden. Since his graduation, Mr. Hartwell has been connected with the Westinghouse Electric Company, where he now holds a responsible position. Miss Moodie has been teaching in the Circleville High School. They are widely known among the students of recent years, who join in wishing them a long and happy life. The young couple left Columbus amid profuse tokens of rice and old shoes from their festive friends for an Eastern trip, after which they will settle on Walnut Street, in the eastern suburbs of Pittsburgh.

Miss Eckka M. Robinson, daughter of Professor L. M. Robinson, was married to Rev. George E. Roe, pastor of First Baptist Church of Waterville, Minn., on Thursday evening, June 25. It was the day after the happy bride's graduation from O. S. U., and made the week the most memorable of her

ceremony at Professor Robinson's home at 6:30 in the evening, and few school friends were received afterwards before the departure of the couple to their Western residence.

THE PHI BETA KAPPA SOCIETY.

Saratoga, N. Y., Sept. 7.—

The National Council of the Convention of American Colleges, Phi Beta Kappa Society, held a session in the Town Hall here this morning. The officers are Colonel Thomas Wentworth Higginson, of Cambridge, Mass., President; Professor Francis P. Nash, of Geneva, N. Y., Vice-President; the Rev. Eben H. Parsons, of Williamstown, Mass., Secretary and Treasurer.

Twenty-seven universities and colleges were represented. Applications for charters from Bucknell University, of Lewisburg, Penn.; the University of Pennsylvania, the University of Minneapolis, Swarthmore College, Tufts College and Wabash College of Crawfordsville, Ind., were received and will be reported, with recommendations, to the next annual Council.

Two-thirds of Yale's graduating class were protectionists.

The revenues of Oxford and Cambridge Universities represent a capital of about seventy-five million dollars.

President Chamberlain, of Wisconsin University, having accepted the head of the Scientific Department in Chicago University in order to devote his time more thoroughly to geology, Ex-President Charles K. Adams of Cornell has been chosen to fill his place.

Dr. Scott and Capt. Cope think there will be in the neighborhood of 800 students this year.

SALUTATION.

Some persons think that we should salute you with a yell, but we are as modest as ever, and our claim to your attention is exactly on the same grounds as it would be were we still the "Lantern" or the "Cardinal and Gray." College yells are essential and in-grown parts of the colleges, and there is no reason why a college paper should not ally itself with this tradition as any other such as a well-known color. If we mistake not "Tiger" is a popular yell and yet Princeton's comic weekly goes by that name, and is first-class. WAHOO is unique and was selected for business reasons as a name, and while we feel the justness of the demand that comes from the alumni that the Lantern should be perpetuated, we think it should be continued as a weekly literary journal. No one seems to care about fostering it after its failure to succeed financially in its old capacity, so there seems to be only one hope that the future will see a revival of this idea and name.

However, as the literary societies are not immovable and still have the naming of the paper in their hands, it may be that if the Alumni Association presses the matter they can secure a restoration of the name at an early date. It would be a wiser thing for them to urge the establishment of the Lantern in its old form as another paper and then support it well. It would succeed with such encouragement, and as nearly all colleges of this size have two or three papers it cannot be said that the field is crowded.

Undoubtedly the differences of opinion over the policy of changing the name, can be adjusted this term if an effort is made. But in the meantime, as editors, we will endeavor to make WAHOO in spite of its abused name, a first-class paper. As you see from its size, it will take work to do so, and we solicit your aid in making it a credit to O. S. U. We desire to hear from and of every alumnus, ex-student and professor and from active students who can furnish news and opinions. We cannot promise to publish everything that is offered, but would gladly encourage those who would like to report things without holding a place on the Board.

If you have a poem or a joke, take advantage of. Party clubs

the editors will kindly undergo it first for the sake of the college and print what there is room for. Only the very best literary productions are desired—a few of the more important productions of the year will be printed. WAHOO will endeavor rather to publish a complete history of the University, to reflect the best college sentiment of the day, and to advance the good of the University, than to keep its readers supplied with the amateur product of embryo literary genius.

ATHLETICS.

Last spring O. S. U. made the best athletic record ever credited to an Ohio College. Our tennis and base ball teams proved invincible, and have an almost unblemished reputation to back them. It is the 1000 per cent mark of the base ball nine in the Inter-collegiate games that must be equalled by our foot ball team this fall. Some of our best material is gone from the nine, but as good an eleven as ever played for O. S. U. may be picked this fall. Many of the Eastern teams agreed to return two weeks early and train for the seasons games. This excellent idea was neglected by us, and as a result we are going to be seriously handicapped in our fight for supremacy as some Ohio colleges have already been open a week.

Two teams ought to be organized at once for practice. Messrs Sears and Ellis should not delay a moment in doing this, and if possible have the first eleven ready to give the Columbus Foot Ball Club a game on our own grounds this Saturday. Capt Bush is very anxious to play at the first opportunity, and Dick Jones, their manager, will be glad to make arrangements at once for the next two Saturdays.

The example of the Columbus Eleven is commendable. They have gone into training in true professional style, and have foresworn all use of stimulants, tobacco in any form, and the eating of pastry and rich food. The lesson to be derived from the notorious John L's late experience, is that the highest physical vigor is incompatible with loose living. The O. S. U. team will have to do some real training this fall to keep in the race, and a few sacrifices will have to be made during the season.

TARDY.

We would remind the Oratorical Association and the classes that performers for the year should be elected at once, as the summer has been lost to those who will take the places. Time is the all important consideration to those who have to prepare for those things.

POLITICS.

Elsewhere in these columns we print the address of President Burke to the College Republican League—not for partisan reasons, for we would gladly publish a similar Democratic or Prohibition communication, but to call attention to the political possibilities of college life. The Presidential campaign comes but once every four years, and should be

should be organized and vigorous educational campaigns conducted. A public debate would be a great feature in the campaign this fall. Some discussion of the great issues, will pay better than mere noise and display, though we must admit that they contribute to the interest and are indispensable. Which party will be the first to plan for the fight? A thorough organization should be effected at once and preparations made for a vigorous participation in the campaign.

Prof. Bleile has been testing Ohio River water at different points for the State Board of Health to determine its relative purity and fitness for use.

Several new fraternity chapter houses are on the bills for the year, but no definite arrangements are completed yet.

Tenth and Eleventh Avenues are building up with an excellent class of houses that offer splendid accommodations to students at a short distance from the University. One of the new clubs on Eleventh Avenue will be almost as near as the Dormitory.

C. B. Morrey will confine himself to physiology this year and give up his Latin teaching.

Miss Young, our good-looking French assistant is now Mrs. Prof. Moore, of Chicago University.

It has been decided to hold the Y. M. C. A. reception on the second Friday night this fall, and more definite arrangements will appear later in this paper.

C. W. Burkett will perform the meteorological work done last year by W. H. Baker, '92.

Are You Reading the Great Articles of
Roswell G. Horr in
THE NEW YORK TRIBUNE?

In October, 1890, THE TRIBUNE engaged Roswell G. Horr, of Michigan, to devote himself in the columns of the paper, and to the new projects of the Farmers' Alliance. THE TRIBUNE has made a brilliant and instructive fight on these questions; and it now announces that Mr. Horr will continue right on his work through the columns of the paper. His writing is genial, entertaining, clear and perfectly unanswerable. A man of simple manners, of high ability, spotless character and long experience in public affairs, born a poor man, and making his way up through a long life of hard and continuous struggle, Mr. Horr is qualified, by every circumstance, to know and understand the hardships of the common people, and to counsel them upon the measures which will promote their prosperity.

There is no doubt but that THE TRIBUNE is a most valuable help to every Republican who wants to inform himself on Republican doctrine, and to Democrats and Alliance men it will be the best National book of reference for an understanding as to what the Republicans intend.

A specialty is made of answering all questions, asked in good faith, relative to The Tariff, Reciprocity, Coinage and the Currency, and the new projects of the Farmers' Alliance.

An amusing illustration of THE TRIBUNE's power in a Tariff debate occurred last winter. The Tariff editor of

The N. Y. World, having challenged THE TRIBUNE to a public joint debate on the Tariff question, THE TRIBUNE

promptly accepted, whereupon The World promptly backed down and refused to go on with the debate.

Two pages a week on Farming, and one for Union veterans, are printed regularly.

A great many distinguished American contributors will write for THE TRIBUNE this year over their own signatures.

Such readers as want a National newspaper, in addition to their own local paper, will do well to send for a sample copy of THE TRIBUNE before deciding on their literature for 1892. Its foreign letters, editorials, book reviews and illustrated features are admirable.

Weekly, \$1.00 per year.

Semi-weekly, \$2.00 per year.

Daily, \$10.00 per year.

TRIBUNE ALMANAC, 1892.

Absolutely Accurate, Non-Partisan, and the Standard.

Three times as large as the Almanac of ten years ago, now having 350 pages, the price of it remains the same, namely, 25 cents. Send your 25 cents to

THE TRIBUNE,
NEW YORK.

OUTINGS AND INNINGS OF STUDENTS DURING VACATION MONTHS

Joe. Campbell, ex-'95 of Cambridge, goes to Phillips Andover, Mass., and prepares for Harvard next year.

Castle, ex-'95, is in Chicago and will travel in the West for a firm of that city.

Tate, '94, has gone to Cincinnati to enter medical college.

Baxter D. McClain will live in Kansas this year, and attend the State University.

Guy Scott, who was taking the mechanical engineering course a year ago, is now the draughtsman of the Pan Handle Railway shops at Dennison, Ohio, but he expects to return to college before the year is over.

E. D. Haywood spent the summer in the engineer's office of the Z. & O. R. R. at Zanesville.

Simon Storer was with his brother at the Westinghouse Electric Company's works near Pittsburgh.

H. O. Williams put in his vacation as book keeper in Pennsylvania R. R. freight offices at Pittsburgh.

Stevenson has been outing on the lakes proselyting new students for O. S. U.

Dr. Orton has returned from a pleasant visit to his old boyhood friend, Dr. John Bascom, in Berkshire Hills of Massachusetts, feeling much improved, having also spent a portion of the summer in Northern Michigan on the lakes.

Prof. Knight attended the meetings of the American Economic Association at Chautauqua in August.

Sid Bennett will attend Delaware this year to prepare for the ministry.

Miss Morhart has been spending the summer at Chautauqua and at Erie, Pa.

J. G. M. Skinner was traveling for a Columbus firm this summer.

Frank Peck and Lieut. Short of the 18th U. S. Cavalry, both former students of O. S. U., were one and the same person during the recent riots at Homestead. Frank kept the Pennsylvania National Guard in U. S. A. order.

The big Dorm will be entirely under new management this year. Gibbs as steward and Mr. Martin, brother of Ed. Martin, as landlord, are going to run a regular palace. Over a thousand dollars have been spent in re-furnishing some of the rooms, while considerable carpentry repairs have been made on the old building.

Miss Minnie Blakeston, former O. S. U. girl, and member of Kappa Kappa Gamma, will return to school this year and enter '94.

Miss Gertrude Owen will not be in college this year, but will pursue her music and art studies outside and take French of a private tutor.

Bert Talbot will keep his position in the city ticket office of the C. H. V. & T. R. R., and the supply store will probably be in the hands of Will Howard.

Matthias Eis, '91, the "phenom" in chemistry, has given up his place as instructor in the Columbus Medical College, to accept one with the title of Professor of Practical Chemistry in the new Ohio Medical University of this city.

Miss Louise Herrick represented the King's Daughters at the Lake Geneva Convention this year.

Director Adams, who will have charge of the new manual training school, has been a professor in the Toledo High School for some years, and has had in that position considerable experience with manual training.

A new system of keeping collegiate students' records has been adopted. Instead of being kept in a ponderous volume or scattered through a number of books, the entire record of a student, while in college, will be kept on a single card, which will be readily accessible and comprehensible. It will enable one to tell at a glance whether his record is clear or otherwise. The labor of transferring the records of old students has taken much time and hard work.

Columbus has a new medical school. Its new building may be seen rising four stories high between Goodale Park and High street. It is temporarily located in one of the brick houses, back of the Sells residence on High street. The University, as it is called, will have Dentistry and Pharmacy in its courses of instruction. Dr. Baldwin, the well known surgeon of Columbus, will be Chancellor of the new institution.

The Trustees have let contracts for the construction of the new power house and heating plant which is to be located between the Chemical Lab. and the Hayes Hall, and some distance to the rear of them. It is designed to furnish steam heat and power for the new buildings and several of the old ones. The total cost of the work will amount to \$27,000.

Miss Jones, the librarian, spent the summer at Amherst, Mass., and other New England towns.

Dr. Gladden was at his best last Sunday in a glowing tribute to the memory of the late George William Curtis with whom he had had a personal acquaintance of many years.

"Texas" Jones has returned from the Sunny South, and will be with '94 again.

The Columbus foot ball team, composed mostly of old college boys, was organized September 5 and the following officers elected: Dick Jones of Harvard, Manager and President; S. P. Bush of Stevens Institute, Captain; and Joe Potter of O. S. U., Treasurer. The club is anxious to meet the University Eleven at once, and will give it some tight tussles this fall.

Hymen has been playing havoc with the daughters of O. S. U. Miss Alice Moodie, Miss Fanny Bancroft, and Miss Robinson are among the latest to change their names, while several intentions are in the wind.

Miss Eastman is at O. S. U. again.

Ernest Coulter is on the campus once more.

Arthur French was slightly injured at the Cleveland Bicycle races two weeks ago and was unable to enter the Columbus Tournament.

Frank Kershaw, Kiesewetter, Eberly Hutchinson, and J. A. Wilgus go to Harvard again. Murray Brush returns to Princeton, John Mitchell to Yale, Pratt to Williams, and Lanman to Cornell.

Theodore Lindenberg spent the summer at his cottage on Huronia Beach.

Dr. Orton will be welcomed back to his old place.

Prof. Whitney's place in the Electrical Lab. is vacant, awaiting a suitable holder at \$1,200 per year.

Prof. Smith and family spent an enjoyable summer in Northern Michigan.

F. WILLIS FAY.

An Old Alumnus Is Dead...

Only a week ago the sad intelligence was published that Willis Fay, the well known architect of this city, was dead. For several years he had been a sufferer from diabetes, and he had made two trips recently to Europe on account of the trouble, only returning from the last one several weeks ago. He felt much improved after this trip, but was suddenly stricken down by the disease and died in a short time. He was 31 years old and leaves a wife and one child. His education was received at the University and he numbers among the graduates of '82. Afterwards he took the degree of Bachelor of Architecture at Cornell, and has since been engaged in that work in this city. He had considerable success in his profession, and is well known to many of us as the architect of the Chemical Laboratory. A host of Alumni friends mourn his early loss, and extend their deepest sympathy to the heart-broken wife and child.

THE DEATH OF MRS. DERBY.

The death of Mrs. Derby, wife of Professor Derby, is one of the sad things that the summer has brought to University circles. All sympathize with the bereaved family over the loss of this noble woman. Her maiden name was Francis Janney and she was known as one of the most intellectual and refined ladies of Columbus. She was a graduate in medicine, having been educated at the Homeopathic College of Boston, but her especial field was with the eye in which she was very successful as a practicing oculist. The last two years of her life she was an invalid. The funeral services were held at the house in Indianapolis Place on Thursday morning, September 1, and the burial was at Green Lawn.

Jesse Coursalt attended the Y. P. S. C. E. meeting held in New York City last July.

ADDRESS OF COLLEGE LEAGUE.

President Burke Urges That its Good Work be Extended.

James F. Burke, president of the College League of Republican Clubs, has issued the following address in behalf of the league:

NEW YORK, Aug. 10.

The American Republican College League has already manifested its value to those who compose it as well as to the regular Republican party organization. It has served to enlist in the cause of Republicanism and good government the most influential element of American growth, which, in time, must become the advance guard of our Nation's political thought and action. The active participation of the college men in the affairs of State cannot fail to gratify every one interested in the purification of politics and the elevation of the standard of citizenship. It is the highest duty of every young American to investigate the principles of the great parties of today, and ally himself with that which he believes to be the truest exponent of the principles of free Government, and whose platform of principles he believes to be in happiest harmony with the doctrines which should guide a progressive and prosperous people.

The Republican party, through the College League, invites such investigation, and affords to the young men of today an opportunity of conducting such research freely, intelligently and without bias.

That the organization may become as permanent and powerful as it should be, we are exerting every effort to advance its growth during the present campaign. President Clarkson has extended to the College Republicans an invitation to participate in the National Convention of the Republican League of the United States, at Buffalo, September 15 and 16. A session of the convention will be devoted to the interests of college men. Every young Republican now in college or eligible to membership in the College League, is earnestly urged to attend this convention. Five thousand college men are expected to be present.

JAMES F. BURKE, Pres.
J. M. PERKINS, Sec'y.

Athletic Goods at Peck's.

Prof. Chalmers and wife after a pleasant trip through Great Britain, returned just in time to escape the recent quarantine regulations in the port of New York.

About seven years ago I had Bronchitis which finally drifted into Consumption, so the doctors said, and they had about given me up. I was confined to my bed. One day my husband went for the doctor, but he was not in his office. The druggist sent me a bottle of Piso's Cure for Consumption. I took two doses of it, and was greatly relieved before the doctor came. He told me to continue its use as long as it helped me. I did so and the result is, I am now sound and well—entirely cured of Consumption.—Mrs. P. E. BAKER, Harrisburg, Ills., Feb. 20, 1891.

Some Phases of the Move for Better Roads.

The close of the war of 1812 found the United States of America fairly established as an independent nation. As soon as the affairs of government, political and financial, came to occupy less important places in the consideration of the people, that people began to look about them upon the land given to them for occupation and to set in motion the various industrial agencies which have attained such wonderful development in the present century. Two schemes for internal improvement were set on foot, which showed the value set upon means of communication by our forefathers. Systems of canals and of public roads were projected. In 1830 to 1840 all ideas of transportation and communication were upset by the advent of steam as a motive power. The steamboat and the locomotive rendered obsolete the canal boat and the stage coach. We are just now entering upon a period of reaction in these matters. For thirty or forty years there have been no canals or highways of any importance constructed in the United States. Now, every engineering periodical is filled with the consideration of schemes for waterways, and our population appears to be demanding with one voice the betterment of our highways.

Mr. N. S. Shaler in the October number of the *Atlantic Monthly* is of the opinion that the bicycle is an invention rivaling in social importance the locomotive and the telegraph.

It is true, certainly, that we shall never know how much of this agitation on the subject of good roads is due to the wheelmen of the country. Every bicyclist is a critic, sometimes unconsciously, but generally consciously, of the road he traverses. These people are scattered far and wide over the land, and are generally of that vigorous, energetic sort of citizens whose ideas are apt to be impressed upon the minds of their fellows.

The official impetus any have given the movement by the action of the League of American Wheelmen by the publication of their journal, entitled, "Good Roads," and by the efforts of such men as Col. Pope, of the Pope Manufacturing Company, the manufacturers of the Columbia wheels, has been important, but the educational effect of the opinions of the dozen wheelmen in every small town on the subject of roads has doubtless done much more in the development of the present interest in highways.

This education of the people in the matter of a desire for better roads is of the greatest importance. Our forefathers responsible to get to the county seat to remember the highways of object.

Great Britain, the roads of Switzerland, and the *Ponts et Chancés* of France, and devoted the first energies of the struggling republic to the construction of the national pikes. Their descendants of the last two generations, never saw a good road in their lives, would not know one if they did see it, and are content to be dragged across the country in dust or through mud, providing only that they may go at sixty miles an hour after seating themselves in a railway car.

It is not the purpose of this paper to discuss the methods of road-building, but the progress of the movement for better roads has been making within the past five years.

First has been the work of the wheelmen. Here are two samples of the sort of sentiment they have been propagating diligently:

"Good roads enlarge the demand for country and suburban property, relieve the cities of surplus population, and enhance the value of farming lands."

"The press all over the country are beginning to preach the true doctrine of general good in the scheme of improved highways. Even those who at one time could only see the cyclists' selfish motives in the League's efforts to bring about that consideration, have come to the very sensible conclusion that the idea has a broader scope than the mere benefit to accrue to wheelmen alone."

One of these paragraphs calls attention to the stand the press has taken in the matter. Not only have the country weeklies and city dailies been full of this literature, but the *Century Magazine*, the *Atlantic Monthly* and others of our best monthlies have contained elaborate articles on the condition of our roads and schemes for their improvement and that of the laws relating to their maintenance. But to show that the press is somewhat in advance of what may be called agricultural sentiment on the question, the following extract is interesting:

"In the State of New York, the county papers were printing long editorials lamenting the hopeless condition of the rural highways and the consequent paralysis of country trade, while commercial reports were published from week to week in which business embarrassments and failures were charged directly to the impassable condition of the country roads."

At the same time wagons were stalled in the mud within sight of the magnificent State House at Albany, and in one county the farmers were signing a petition for the postponement of a hearing

of objections to a proposed road improvement because the roads were so bad they found it impossible to get to the county seat to attend the hearing.

The largest popular movement in this direction is the call for a meeting to be held at Chicago, Dedication Week, to form a National League in the interest of good roads. The signers of the call for this meeting represent boards of trade, road societies, boards of agriculture and legislative assemblies. Indeed this list of signers is the most imposing paper I have had before me in my preparation of this article.

Next we come to the action of our government. The Massachusetts State Highway Commission enters upon its first year's work with a survey of all highways in the State and a photographic record of their condition. The Senate of the United States on July 27, 1892, passed a bill to create a National Highway Commission and to prescribe its duties. Its purpose is a general inquiry into the condition of highways throughout the United States and the means for their improvement. I am not informed whether this bill became a law before the adjournment of Congress. An exhaustive memorial was presented to Congress on the subject of a comprehensive exhibit of roads, their construction and maintenance, at the World's Columbian Exposition. I may state that the principal part of the exhibit on roads is classed now in group 152 of the Department of Liberal Arts.

The publication by the Department of State of a collection of reports of Streets and Highways of Foreign Countries, has put in the hands of those interested in highway work a most excellent manual, setting forth in convenient form the best European practice in road construction. These reports were prepared by the U. S. consuls throughout the world.

The last phase of this movement promises to be the most important one. Our schools are recognizing the call that is already making itself heard for competent highway engineers. The Lawrence Scientific School of Harvard University and Massachusetts Institute of Technology are the first to announce courses in highway engineering. In a paper published in the current number of the Journal of the Association of Engineering Societies the Instructor at the Boston school gives an outline of the work required in the course and states that three of the present year's graduates have taken thesis in this line. It is evident that in order to build the best highway a man should have all the topography of the region he is to traverse before him and that he should possess the most intimate knowledge of its geology.

In conclusion it may be said that the Ohio State University has not stood still in this matter. Prof. Hunt of the Agricultural Department has called the attention of his classes to the move-

ment and has added to his library the series of prize essays on roads published by the University of Pennsylvania. The movement is certainly one of sufficient importance to attract the attention of every technical school.

W. M. R.

THE ZANESVILLE TRIP.

THE GEOLOGY CLASS MAKES AN EXCURSION TO ZANESVILLE.

Last Saturday was a day of great enjoyment to the geologists and geological students of the University. The Columbus, Shawnee and Hocking railroad very kindly placed a car at the disposal of Dr. Orton for the day and he gladly availed himself of the opportunity to take his advanced geology class to Zanesville—the place of such historical geological interest.

Besides the class mentioned, Dr. Orton was accompanied by his wife and two younger children and Captain Cope and wife, Assistants H. A. Surface and W. C. Werner, and Misses Talbot and Claypoole, who were members of last year's geology class.

The principal features of the excursion are given below and the readers of the *WAHOO* who are accustomed to travel between Columbus and Zanesville may now find diversion in the objects of geological interest that lie along the road. One place of considerable interest to the residents of Columbus is Thurston (formerly known as Hadley Junction) on account of the important gas supply that here lies deep under the surface of the earth, and from which we receive our natural gas.

Another feature of considerable interest is the line of gravel hills between Baltimore and Thornport. This line of gravel is called the terminal moraine of the glacial drift, because it marks the southeastern limit of the very ancient glacier in Ohio. Throughout the State to the west, northwest, and north of this limit a great many large boulders and rounded rocks of all kinds are to be found, but southeast of the moraine no boulders, gravel or rounded stones are to be seen, and the loose rocks are quite angular and are found very near their original places, where they were formed.

At Glenford, between Thornport and Fultonham, the class noticed the white sandstone quarries in the formation known as the carboniferous conglomerate. This sandstone is sometimes called "The Glass Rock," on account of being used in the manufacture of glass. At Fultonham there are limestone quarries in the Maxville limestone. These are interesting, from the fact that they come in one of the lowest formations of the coal measure series. From here on toward Zanesville beautiful exposures of the same rock may be seen in the

creek bed, and a great many handsome and valuable fossils may easily be found.

But at Zanesville, where the excursion arrived at ten o'clock, the geologist reaches his *ultima thule*. In Putnam hill, just at the left of the railroad, as he enters the city, there are found five stratas of coal and fire-clay, four of sandstone and three of limestone. This is one of the finest places that the State affords for the study of stratigraphical geology, and to be appreciated must be seen; and it must be added that special relish is given the pleasure if the observer can be in company with Dr. Orton, who certainly can tell it as can no other. This hill measures 200 feet in perpendicular height and affords ample opportunity for study and sketches, as the coal, clay, limestone and sandstone are all worked. Three cameras were in the party and were kept actively at work by Prof. Bradford, Mr. Taylor and Mr. Surface.

After having obtained the order of the formations, collected a great number of specimens and seeing the tile and brick works, the enthusiastic students returned with cheerful spirits and thankful feelings to write and study up their notes upon the work of the day and to contemplate upon the fact that this earth is "fearfully and wonderfully made."

The generosity of the C. S. & H. R. R. will not soon be forgotten by O. S. U. students who took advantage of the profitable trip. The railroad has advanced the cause of science and favored the University at the same time. Other railroads which enter the city no doubt will be as willing as the C. S. & H. to extend such courtesies, which must result in advertising the line and materials of their transportation.

The School of Law.

The Post Graduate class has commenced work in the Common Pleas practice under the instruction of Paul Jones, Esq., City Solicitor; the class meets on Tuesdays from five to six o'clock.

The class in Probate practice will begin its work next week under the direction of S. C. Jones, Esq.

The Juniors take up the study of Agency next Tuesday evening at seven o'clock, and will have recitations every Tuesday and Friday evenings at that hour.

Arrangements have about been completed whereby Mr. Charles R. Miller, of Canton, Ohio, will deliver eight lectures on the subject of "Patents" during the spring term.

The average of the class in the examination held in Robinson's Elementary Law last Friday was seventy-seven per cent., six being above ninety; the examination was upon the first book and consisted of twenty-five questions.

WAHOO.

PUBLISHED SEMI-WEEKLY DURING COLLEGE YEAR
EVERY TUESDAY AND FRIDAY

BY THE

Literary Societies of the Ohio State University.

Subscription price, \$1.50 per year in advance, otherwise \$2.00 per year; 50 cts. per term in advance, otherwise 60 cts. per term.

Subscriptions may be handed to any of the editors, but it will save trouble to give them direct to the BUSINESS MANAGER.

WAHOO cordially solicits from all members of the University, faculty and students, and especially desirous persons from business and private Communications should be signed by writer with his address, and be received the day before issue.

WAHOO is on sale at the Supply Store,

Address all matter intended for publication to the Editor-in-Chief, and all business communications to the BUSINESS MANAGER.

Address, WAHOO, Columbus, Ohio.

POLITICAL SCIENCE.

The establishment at O. S. U. of an association for the advancement of Political Science is one of the signs of progress in Ohio's University that it is pleasing to note. While preeminently a technical school, our institution has by no means neglected the more liberal studies in the field of Sociology and Economics. This is evidenced by the popularity of the latter work which has over 100 students at present in the department. Considering this state of affairs it was not a premature proposal to establish a little society among the students interested in these subjects, for doing a kind of work that could not be done in the class-room nor yet by individual study. Some twenty persons have agreed to devote a portion of their time to systematic reading of questions of the day, and to meet once every two weeks and after listening to a paper upon some topic of current history, or equally valuable researches in past history, to discuss the most important matters of interest in the economic and sociological world of to-day. This latter work will be wholly informal, but will take as its basis reports upon the months periodicals as presented by the various members. It is not designed to impose any laborious duties upon those who take part, more than to make them more careful and systematic in their regular periodical reading. The value of the informal discussions will be found in the added insight they will give to the reading, the re-digestion, so to speak, of what has been hurriedly gathered from magazine reading during a fortnight.

Perhaps, though, the most important function that the organization will fulfill, is in its purpose to secure as many prominent men conversant with economic subjects to give informal evening talks to the members. Last year Prof. John Fiske offered to talk to such a body of students, but the opportunity was lost because O. S. U. had none. The new society will take care of such men hereafter when they are so convenient and so willing. Perhaps during the year a dozen carefully prepared papers will be presented by the active members, and these will represent real

work, though it is not necessary that such work should represent study wholly outside of the required work in college. It is quite evident that the pleasure and profit to be derived from the meeting of the association will amply repay the trouble that members will have to take in preparing for them. The eligible membership as now decided upon will consist of those who have taken or are now taking studies in the department of History and Political Science. Unless the number of members increases beyond the size of a drawing room circle, Prof. Knight's home will be the fortnightly rendezvous. All those who are interested from more than motives of curiosity are invited cordially to join the association.

GOOD ROADS.

While the whole American people have begun to think upon the problem of securing better roads, and especially since several prominent universities have made the subject a matter of serious consideration, we thought it not inappropriate to publish an article upon this subject which is not without merit, and which comes from the pen of an engineering student of O. S. U. Since Ohio is about as much in need of good roads as any land under the rain clouds of heaven, it will be a fortunate day when the State University makes this study an important part of the engineering work of the institution. We hope that the Legislature of Ohio and the Engineering Department of its University will not be insensible to the widespread demand for more scientific treatment of this question.

THE MCKINLEY CLUB.

The McKinley Club met in the Chapel Tuesday and reorganized for the coming year. Mr. W. K. Palmer acted as chairman and Mr. Beumley as secretary. The election of officers resulted as follows: President, Walter J. Sears; Vice President, H. H. Hatcher; Secretary, D. A. Carson; Treasurer, T. D. Dunlap; Grand Marshall, J. H. Bone; and Sergeant-at-Arms, S. G. Osborn.

A committee composed of Messrs Sears, Meyers and Beumley was appointed to confer with the Thurman Club upon the matter of a joint discussion of the political issues of the present campaign.

President Sears also appointed another committee, consisting of Messrs W. K. Palmer, K. D. Schwartzel and S. G. Osborn, to canvas the Republican voters and obtain for them free transportation to their respective homes on election day. All Republican voters should see some member of this committee and secure all the data needful toward the end of exercising your citizenship next November.

The committees on joint discussion should get to work and give us a lively battle before the campaign closes.

A Tonic

HORSFORD'S ACID PHOSPHATE

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

DR. EBRAIM BATEMAN, Cedarville, N. J. says:

"I have used it for several years, not only in my practice, but in my own individual case, and find it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and imitations.

CAUTION.—Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

Locals and Personals

Mr. C. P. Sigerfoos is now established at Johns Hopkins, having Morphology for his major study and Physiology and Pathology for subsidiaries. He rooms at the Beta House and already seems quite at home.

Miss Nellie Roney, '94, has been compelled to close her school in New California owing to an outbreak of malignant diphtheria among her pupils.

L. T. McGruder from Marietta College has entered the class of '95. Mr. Rudy is another student that has come to us from Marietta this year.

Mr. Charles Beumler is spending a few days in New York attending the Columbian Anniversary celebration.

Owing to a misunderstanding of the P. O. officials WAHOO was carried awhile by the city carriers for one cent a pound, but hereafter it will cost a cent a copy for delivery, and we will have to ask all student subscribers to get their copies at the University.

Mr. C. A. Phelps, who graduated from the science department last year, is now working in an Assaying Laboratory in Pueblo, Colorado.

The scars seen on Prof. Emery's face the last few days are the result of an accident that befell him while riding his bicycle on North Broadway not long since.

The Senior girls have abolished another of the traditional customs of our Institution by occupying the last, instead of the first, row of chairs during the Logic recitation.

Mrs. Professor Robinson has been quite sick for the week past, with an attack of malarial neuralgia.

N. G. Buxton of O. S. U. last year and now at Leland Stanford, Jr., writes from Palo Alto, California: "Please send me \$1.00 worth of your celebrated WAHOO."

Modest Marshall, of our editorial staff, did not mention in his account of the recent district Y. M. C. A. Convention at Marion that O. S. U. was represented and that her delegates took a prominent part. Mr. Marshall reviewed their history of the Building Movement at O. S. U. and the good it has done O. S. U. before the convention, and on Sunday occupied one of the city pulpits.

H. M. Linn, now at New Concord, will not return this year on account of the death of his father during the past summer.

V. H. Barnd has gone to his home at Fostoria and will not remain in school this term.

Prof. Mendenhall and the Canadian Commissioner have determined that Mt. St. Elias is one mile over the line in British territory.

Capt. J. H. Bond, who won the prize sword last year, has arranged his studies so that he can drill, and will doubtless raise the standard of the battalion.

Tod Roy's work in the "wild and wooly West" takes him to four coal mines in Arkansas and to two in the Indian Territory which are close to Irvin Duncan's O. S. U. settlement in Texas.

The Brice Club suggested last week did not materialize, but an idea of more importance still has taken shape in the formation of the Political Science Association which is now an assured thing.

An account of the marriage of J. S. Meyers, class of '87, to one of Pittsburgh's most charming and well known young ladies, appears in the Pittsburgh Dispatch for Sunday, October 9.

The misapprehension has gotten abroad that the enrollment of students at the University is not a great deal larger than it was last year. For the gratification of any such, and of all others, we take pleasure in stating that the enrollment at present, excluding the Law School, is 684, while last year, including the Law School, was but 664, and adding the Law students of the present year to the present enrollment, we reach the magnificent number of 725. This year is no exception in the steady growth of our Institution.

Mr. Beumler has been visiting for the last few days in southern Ohio.

Since the Faculty meeting, Capt. Innis says he does not want to drill.

OFF TO OBERLIN.

The foot ball team left Friday afternoon for Oberlin, where they will line up against the famous eleven of that place. Manager Sears does not hope to win, nor is that the purpose of the game. It is rather as a test of the strength of the present eleven, affording, as it will, a splendid opportunity to learn the different weak points that must always be overcome in a new eleven. Such information will be of invaluable service to Mr. Rider who will then know where to apply his able coaching.

To show the new men what they must expect in a real hard game, and to make plain the team's weaknesses, this alone will be well worth the while of meeting the northern team, even though it may outrank and outplay us.

Yet we cannot imagine that the defeat will be an overwhelming one. The team is in pretty fair condition, and their training for the past three weeks has been hard and systematic. Whether beaten or no, they will give Oberlin a tolerably hard fight.

The team is as follows: Center—Powell. Guards—Reed and Mathews. Tackle—Walsh and Thompson.

Ends—Capt. Ellis and Griffith. Half-Backs—Gillan and Ernst. Quarter-Back—Haas. Full-Back—Withoff.

Substitutes—Kennedy, Zurn, Ernest and Gienheimer.

Mr. Rider, the coach, and Manager Sears accompanied the boys, and will keep a careful eye over them while on the trip.

Assistant Manager Askew will receive reports of the games and the dorm bulletin board will afford the first news.

THE SEWER.

It seems bad enough that the original contract for a piece of municipal work like that of the big sewer should be a piece of jobbery, but when the attempt to properly remedy the damage done by the original job should be made a subject of jobbery also, one is inclined to lose faith altogether in the efficacy of our municipal corporations. The City Board of Public Works expressly authorized the City Engineer to reconstruct that portion of the sewer which destroyed the spring by the faulty work done on it. But a look at the method which is now being employed to restore the spring will show that nothing of the sort is being done. Nothing but the poorest excuse of an expedient has been attempted. A trench on the side of the sewer next the spring was dug and then tamped full of clay, upon the supposition that this would keep the water from leaking away. What is needed are bricks and cement so put together that they will be impervious to water, a thing by no means impossible. The proper authorities are certainly aware of this, and they know that more time has been "fiddled away" already than would be necessary to do the work properly. It is now late in the fall, and unless the sewer is torn up at once and put down again as it should be, it will be too late, and we will pass through another winter without the spring. Even if the miserable expedient which is being palmed off on us, should work, it is only a question of time when the sewer will have to be rebuilt. It is bad economy on the part of anybody to patch things in this style, and it looks like a queer disposal of money for the city to fool around, as it has been, not

doing what it has promised to do. As has been said, it looks like "putrefaction in Denmark."

AN APPEAL.

The College Band has again organized and its familiar strains once more greet the ears of the University public. It is at present, however, composed of but twelve members. Some of these have proved themselves to be masters of their art, several having done themselves credit in much better musical organizations than were ever represented at the University. But in order to fill its place on the battalion it is necessary that it be larger than this. There are many musicians in College who have their own instruments and who could not better serve their Institution than by joining this necessary organization. The battalion has won a wide reputation throughout the State for its thorough and efficient work. It has on several occasions brought honors to the University. The high order of our prize drills is manifest by the public interest taken in them.

In order, however, to have a complete battalion—one that will make the best appearance on dress parades, on University Day and other public occasions—it is absolutely necessary that the band make music and plenty of it. We appeal to the musicians of the University to sacrifice themselves sufficiently to send home for their instruments, or to bring them to school if they have them with them, and assist in strengthening this weak branch of our military forces.

It is true that the instruments are miserable, and that it is impossible to do the best work with them; but there is no better way to persuade the Trustees to get new ones than by showing them that we know how to use what we have. Join the band!

"How d'ye come in?"

"Why I just stepped in and found that 'Gov. Frederick' is running the neatest and best shoe repair shop in Columbus at the corner of High and Euclid Ave., East Side."

"Glad to see you, anyhow."

VOL. XIII.

OHIO STATE UNIVERSITY, OCTOBER 17, 1892.

No. 10.

IT WAS A DEFEAT.

BUT IT WAS STOUTLY FOUGHT FROM BEGINNING TO END.

The Game With Oberlin Proves That O. S. U. is Made of Lots of Nerve and Mettle, and that She is Put Up to Win in Her Own Class.

SP. TO OHIO STATE JOURNAL.

Oberlin, O., Oct. 15.—The Ohio State University team played at Oberlin today. Though outplayed they fought a plucky up-hill game. The good work of Captain Ellis and of Haas is especially worthy of note. In tackling the visiting team excelled their heavier opponents, though they were not so good at bucking the line and at intervening for the runner. The playing of Captain Williams and Savage for Oberlin is especially to be commended. Both teams played a good, clear game, though perhaps the Oberlin men played a little roughly. Ohio State university is to be congratulated on her team. The score is as follows: Oberlin 40, O. S. U. 0. Touchdown—Savage 3, Jones 2, Williams, Teeers. Goals—Hart 6.

The above as given in the *Ohio State Journal* by an Oberlin correspondent is with a very fair and impartial report of the game. O. S. U. was powerless against Oberlin's tremendous rush line, and she was equally ineffective in blocking for her runner. This easily explains our defeat. Oberlin could play havoc through our center and run at will with the ball. This explains her victory. Yet against all these over-towering odds O. S. U. won even the admiration of Oberlin for her gritty, desperate playing, and particularly for her brilliant tackling.

But neither Mr. Ryder nor Manager Sears nor Capt. Ellis is repining over the defeat. Nothing was lost, everything was gained. The purpose of the game was more than fulfilled. The weaknesses of our eleven were made apparent, and the men were given a taste of first-class ball playing. The good results of this knowledge will be felt throughout the whole season.

Manager Sears was seen and said: "I am delighted with the stubborn, nervy game that our team put up. They were out-classed and played against great odds, yet they played game to the end. As to our trip, it was a pleasant one throughout. Manager Hogan of the Oberlin team treated us exceedingly courteously, while we found the Oberlin men to be gentlemen, and thoroughly decent college men."

NOTES.

Gilliam's "glass" arm put him out of the game before it had been going ten minutes. Kennedy took his place and played well. He helped to win the compliments we received for brilliant tackling.

Oberlin carried two of her men from the field, their big center

rush and left end, O. S. U. gave them a terrible battle after all.

Haas really played a phenomenal game. His tackling was something wonderful.

The ride across the country from Wellington to Oberlin was a jolly one.

Mr. Charlie Martin of the Dorm. was the pleasant "backer" of the team.

Mr. Ryder was a great source of inspiration, and he should accompany the team on every trip.

GO TO THE GAME.

Our team plays its first championship game with Buchtel next Saturday afternoon at the Athletic Field. Our team will be in first-class condition and an exciting game may be looked for. Every student and prof. should see it. Make your arrangements for it, and be there without fail.

OTHER GAMES.

Last Saturday was given over to foot ball throughout the country. Here are some of the games that were played:

Case vs. Buchtel, 14 to 9. C. A. C. vs. Adelbert, 16 to 4. Kenyon vs. Otterbein, 18 to 12. Dayton vs. O. W. U., 28 to 0. Harvard vs. Williams, 55 to 0. Yale vs. Manhattan, 22 to 0.

The School of Law.

A. R. Warren, '93, tried a case before Justice Gallagher yesterday.

Many of the students expect to spend the Friday vacation at their homes, returning in time for work on Monday.

"European civilization may have wrought changes, but up to a few years ago the Chinese code was so simple that the services of attorneys were not necessary, and there was not a lawyer in the whole Empire."

A number of last year's graduates, among them being L. G. Addison, J. F. Fergus, F. P. Jackson, Jerry Dennis and E. W. Voorhees were assigned their first cases on the criminal docket last week, and they will probably appear and deliver their maiden speeches before Judge Evans sometime during the Fall Term of Court. The Law School wishes them success in this and all the other cases in which they will partake.

FRATERNITY NOTES.

The Phi Delt boys have moved into very pleasant rooms in the Hayden Block on East Broad Street.

M. W. Lawrence was introduced to the Phi Gamma Delta goat last Thursday night.

Mr. Baldwin, '98, is the latest Phi Delt.

The three center men of the Wesleyan team weigh over 600 pounds.

ANOTHER FEAST.

WER SERVED BY THE LITERARY SOCIETIES OF O. S. U.

Alcyone, Horton and Browning Continue Their Good Work and Add Many New Men to Their Ranks.

The good work that is being done by our literary societies is certainly to be commended. It speaks well for the intellectual spirit of the University and we trust they will continue throughout the college year as they have begun. Their programs last Friday were as follows:

HORTON.

The regular meeting of Horton last Friday was, to say the least, most interesting. The first literary production was an essay on William Tell, by Mr. Backhaus. The paper was carefully prepared and well read. This was followed by an excellent declamation by Mr. F. C. Miller. Mr. Will Coney came next with a guitar solo. Of course everybody expected something fine and nobody was disappointed.

The lecture on Thomas A. Edison by Mr. Stull was also an interesting production after which was announced "The news of the day," by Mr. Moody. This was a novel performance and consisted in Mr. Moody reading the aforementioned "news" from a newspaper of such magnificent latitude and longitude, that when he held it up to read, he was completely "out of sight."

The question for the regular debate was, "Resolved, that concentration of capital is not injurious to the best interests of a community." According to program Messrs K. F. Postle and L. E. Andrews were to support the affirmative, and Messrs H. G. Killheffer and E. S. Woodborne the negative. Since Mr. Woodborne was engaged in running the dynamo in the Electrical building, he could not take his part in the debate, but as he nobly wired his regrets in the shape of electric illumination, he was excused, and Mr. Hayward was chosen to fill his place, which he did with credit. The debate was a strong one throughout.

Mr. Mesloh, the most prominent visitor of the evening, made a few remarks, and promised to come again.

Mr. Herbert Scott acted as critic, and no one will deny that his report was one of the "salient features." It was a fitting climax to the literary program.

At the business meeting six new members were elected. A committee of three was appointed to confer with a like committee from Alcyone, concerning society contest. The new officers were also installed, and we regret that Pres. Hayward's inaugural cannot be given in full. In brief, the policy of the administration will be protection and reciprocity. Mr. Plantz, the incoming Sergeant-at-arms accepted his high

position with becoming humility. He proposes some sweeping reforms, and intends to succeed or fail in the attempt. Long may he live as Knight of the Broom.

ALCYONE.

A thoroughly good program was presented to the friends and members of Alcyone on last Friday night. The opening number was instrumental music, after which Mr. Foulk gave the society an excellently chosen reading from Ruskin's *Sesame and Lilies*, followed by more music in the shape of a very enjoyable tenor solo from Mr. Boggess.

Alcyone believes that the way to make her members at ease upon the floor is to accustom them to extemporaneous speaking. Mr. Cunningham in response to the President's request gave a short talk about his engineering work last summer. Mr. Myers carefully and interestingly traced the development of athletics, with a resume of the sports in vogue at present. Mr. Logan's report of the week's political aspect was comprehensive and forcible, while the debate, Resolved that Anti-Catholic organizations should be condemned, was carried out in an earnest and serious manner. The speakers were Mr. Frances and Mr. Graves in the affirmative, Mr. Wright and Mr. Sater in the negative.

In the business meeting Mr. J. G. Skinner was elected orator on the local contest, and Mr. Harry F. Brand was initiated into the society. The names of four other gentlemen were referred to the committee on membership. A committee was appointed to wait on Horton Society and suggest that measures be taken for the arrangement of a Literary Society Contest in the spring term.

CHICAGO UNIVERSITY.

One thousand to start on, and in numbers the U. of C. ranks at its opening with many of the oldest of American colleges. More than five hundred registered the first day, and the University without ceremony began to educate at once. Chapel was attended by them, and then they went to recitations as if the University had been doing that sort of thing for centuries. Now that the institution is running, despite the prejudice that many of its rivals have tried to excite against it, it

stands as the most remarkable institution ever established as it has been. The idea that a good college must be a thing of growth, the slower the better, falls flat. Just as in the business world, it has been shown that when a university starts with plenty of capital in the hands of recognized leaders in the business, customers do not ask how old the school is. They know that it is brains and facilities that make the best product after all.

Chicago University has both.

OUR CELEBRATION

OF COLUMBUS DAY WILL BE A THOROUGHLY INTERESTING ONE.

Prof. Knight will give us a Treat and the Audience will join in Singing the National Hymn.

The literary societies have shown praiseworthy zeal and energy in their preparation of a fitting celebration of Columbus Day. In this our University will simply be keeping step with the many thousands throughout the land. The occasion should be a memorable one at O. S. U., and the chapel should be filled.

Following is the program as it has been arranged for Friday evening, the 21st:

Invocation—Prof. James Chalmers.

Bass Solo—Mr. J. P. Byers.

Columbian Ode—Read by Mrs. Willis O. Robb.

Bass Solo—Mr. Byers.

Address, Christopher Columbus—Prof. Geo. W. Knight.

Music—"America," by the audience.

Benediction—Dr. Scott.

The committee has succeeded in arranging what it believes to be a very excellent program for next Friday night, but owing to counter-celebrations, it will require some effort on the part of the students to secure an audience worthy of the program. Let the down-town boys spread the an- nouncement, and let every O. S. U. man be present himself and see to it that the college girls are there. It ought not to need urging to bring out a large crowd, and we feel sure that every one who attends will be greatly instructed and pleased.

The twenty-four columns of representative Ohio building stones, intended for the main hall of the Orton Hall, are finished, and may be seen lying on the ground in front of the new building. They are as beautiful as unique and form a collection that will be one of the most interesting things in the hall.

Next to our own Geological Building perhaps the handsomest public edifice in Columbus is the new School Library on Town Street which was made by remodeling the Town Street M. E. Church. Some of the details of stone work on the front are exquisite. The 22,000 volumes which are shortly to be increased to 40,000 make the library a valuable one to students.

Are you going to the World's Fair? If so, it will be to your advantage to read the circulars of the Temperance Hotel which will be found on the library tables.

The University of Pennsylvania is to have a new dormitory costing \$125,000. It is to be the largest in the United States.

The Russian Imperial Government has granted \$200,000 for a medical school for women, to be established in St. Petersburg.

WAHOO.

PUBLISHED SEMI-WEEKLY DURING COLLEGE YEAR
EVERY TUESDAY AND FRIDAY

BY THE

Literary Societies of the Ohio State University.

Subscription price, \$1.50 per year in advance, otherwise \$2.00 per month, \$1.00 per term in advance, otherwise \$1.00.

Subscriptions may be handed to any of the editors, but it will save trouble to give them direct to the BUSINESS MANAGER.

WAHOO is on sale at the Supply Store.

Address all matter intended for publication to the Editor-in-Chief, and all business communications should be sent to the Business Manager. Address, WAHOO, Columbus, Ohio.

Editorials.

An ex-student of the O. S. U., has a brother in an eastern college, whom he has been trying to persuade to come to O. S. U. He sent the brother a catalogue, and soon received assurance that his desires would be fulfilled. Moreover within a few days he received a postal card, saying:

Dear Brother—I have made good use of my O. S. U. catalogue and another of the fellows here has about decided to go there next term. Please have a catalogue sent to ——

Let the good work go on.

TENNYSON.

Many have been discussing of late the life and works of the poet Tennyson. His career should be interesting to us as students. The poet passed his student life at Trinity College, Cambridge, Eng. He and a brother matriculated at the same time; both considered very talented. But a difference soon began to show itself and was clearly marked in the competition for literary prizes.

His talent was first acknowledged in the organ of the famous debating club called the *Union* of which the poet was a member. It is said that here he and the kindred spirits which he drew about him, found a congenial sphere for airing their opinions. It was here that the poet had his jolliest times. The debating club was a main source of recreation, unless we exclude a number of private theatricals of which the poet seems to have been very fond. It was here that he became acquainted with men afterwards great. Such a man was Richard French, familiar to those who have been taking the Freshman Rhetoric.

The poet's best and most intimate friend was Arthur Hallam. Seek where you may and you will find no truer friendship than that existing between these two college students. The one was the light and joy of the other. The one was soon to be taken away and the other to mourn his loss. Tennyson's eldest son bears the name of Hallam. This was the just tribute to the departed friend. The lasting tribute was the employment of his poetical gifts to bestow them in erecting a monument to his friend upon which he carved bas-relief of exceeding grace and beauty worked

delicate flowers and emblematic devices, and upon the summit he put the statue of his friend. In Memoriam, recalls vividly the times spent in the debating club. When he went there in his old age he found that the scene had changed. The clear voice of the earnest debater was replaced by coarse laughter and the clinking of glasses. This was too much for the aged poet. He cared not to enter.

No lengthy search would perhaps be necessary to find a repetition of the last scene in our own midst. Students are only too often tempted to meet and pass their time with no profit to themselves or others.

Other incidents of the poet's life would be equally interesting and instructive to us as students, but we will leave our reader to gather the facts himself.

PHYSICAL CULTURE SUITS.

In removing from Dr. Bleile's room the old apparatus of the young ladies' gymnasium that used to be, some peculiar costumes were discovered packed away in a box. The only theory so far advanced is that these were the suits worn by the girls of the "physical culture fad" way back in 1885. These suits are in the possession of the Physiological Department and any of the young ladies wishing to secure a pattern should apply to the laboratory at once.

There is also a strong jacket, doubtless belonging to the male instructor (for such they had in those days), but it would be just the thing for some of our weak chested foot ball players.

Richard Kutsch is now with Frank Peck.

Innis and Kennedy are resuming their studies in the University.

Miss Charlotte Claypoole will teach Physical Culture this winter with Miss Latham.

"Barney" Flynn has the position of Computer in the U. S. Geodetic Survey. He was first in a class of sixty.

If the students are careful to give their addresses, as desired the Students Directory will be out the early part of next week.

Student in Political Economy—"Capital is something to draw on."

Prof. Knight—"A slate, for example."

Geo. Bloom, '89, of the Maintenance of Way Dept., B. & O. R. R., spent Sunday at O. S. U. the guest of his brother Ed. and the Phi Delt.

Miss Julia Steinfeld of the class '92, Columbus High School, has entered the Freshman class. She was prevented by sickness from entering at the beginning of the term.

Prof. W. G. Tight of Denison University, and Prof. J. N. Bradford of the Ohio State University, have been appointed members of a committee of the Ohio State Academy of Science, to collect photographs of all objects of scientific interest in the state and thus secure and publish the facts.

For the Pipe.

A Tonic

HORSFORD'S ACID PHOSPHATE

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

DR. EPHRAIM BATEMAN, Cedarville, N. J. says:

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

Descriptive pamphlet free.

Horsford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION:—Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

The Fashionable Tailors of Columbus are found at 182 North and 304 South High Street. A large stock always on hand. Special rates to students. D. M. Moore, Qates & Co.

COLUMBUS LECTURE COURSE. 1892—FOURTH SEASON—1893.

Ten Entertainments in the Thursday Evenings.

BOARD OF TRADE AUDITORIUM.

PROGRAMME.

(1) Thursday Even'g, November 10. LECTURE.

WILL CARLETON. Subject: "Better Times," with Selections from His Own Poems.

(2) Thursday Even'g, November 24. CONCERT.

New York Philharmonic Club. Eugene Weinner, Flute. Ernest Mann, Violoncello. Sebastian Landner, Violin. Louis Hirsch, Double Bass. Friedhold Hermann, Violin. August Kalkhoff, Double Bass. Miss Marion S. Weed, Contralto.

(3) Thursday Even'g, December 15. LECTURE.

PAUL B. CHAILLU. Subject: "The Land of the Midnight Sun," illustrated by 75 Steel engravings.

(4) Thursday Even'g, December 29. CONCERT.

THE JUBILEE SINGERS.

(5) Thursday Evening, January 12. RECITAL.

LELAND POWERS. In the Irish Play of "THE SHAUGHRAUN," by Dion Boucicault, in Three Acts. Music by the COLUMBUS T. COUBADTURE.

(6) Thursday Evening, January 26. LECTURE.

REV. FRANK W. GUNSAULUS. Subject: "The Later Eloquence of Puritanism."

(7) Thursday Evening, February 9. LECTURE.

MAJOR HENRY C. DANE. Subject: "The Great Naval Battles of the Revolution."

(8) Thursday Evening, February 23. CONCERT.

BOST'N TEMPLE QUARTET. S. M. SPEARS, First Tenor. E. F. BROWN, Second Tenor. H. A. COOK, Bass. A. C. RYDER, Alto. MISS FAY DAVIS, Reader.

(9) Thursday Evening, March 9. LECTURE.

JAHU DeWITT MILLER. Subject: "The Emigration Problem—The Strangers at Our Gates."

(10) Thursday Evening, March 23. CONCERT.

MZART SYMPH NY CLUB. JOHN RHODES, Violin. FREDERICK COOPER, Cornet. SCAR HUNTCHESTER, Violin. RICHARD STOHLER, Viola. MARIO BODDICK, Violoncello. MME. CAMILLIE TOULMIN, Harp. MISS MARY FOREST, Soprano.

Season tickets, \$2.00. Including reserved seats, \$2.50, \$3.00 and \$3.50; owing to location of seat.

ONE FREE TICKET WITH EVERY CLUB OF TEN. Reserved seats sold at the advance sale only to Subscribers.

Students of O. S. U. leave orders with WILL HOWARD AT SUPPLY STORE, or by mail to

A. A. GRAHAM,
03 West Eighth Avenue, Columbus, Ohio.

Locals and Personals

Miss A. E. Simpson is attending Adelbert College, Cleveland.

Mr. G. V. Clum spent Sunday at his home, near Thornville.

Rev. Thomas Chalmers, on his road to attend the General Christian Missionary Association, at Nashville, Tenn., stopped over for a few days at Columbus. He occupied chapel hour Friday with a very pleasant and thoughtful lecture.

The Bible Class, under charge of Prof. Smith, met at the Mission Hall on the corner of Euclid avenue and High street Sunday afternoon with fifteen members. The class will take up the study of Luke. Others are known who will become members. Those who projected it are much gratified with its successful outlook.

Rev. Thomas Chalmers gave an interesting talk on Job to the class in the English Bible Friday.

Professor Knight has placed all of the books relating to the early history of America on the reserved list, and they are not to be taken from the library.

A new feature has been added to the library in the shape of a bulletin board. On this bulletin are to be found lists of books lately accessioned to the library, reference lists, lists of books overdue, etc. It will be to the advantage of every student to observe the lists posted there, as he may be saved much time and labor.

The librarian requests all students having access to the alcoves to look at the notices posted on the shelves.

Miss Marie Eckhardt has left college.

Miss Mame Hurst, of Chillicothe, a daughter of General Hurst, visited the University last Friday.

Miss Josephine Garner has left college.

Lovers of good tennis witnessed a lively game on the campus last Friday afternoon between the Columbus team and O. S. U. Messrs. Allen Patten and Cart Nelson played for Columbus and Farber and Coney for O. S. U. The Columbus men won the first set by 6-4. The second and third sets, after hard playing on both sides, resulted in favor of O. S. U., the scores being respectively 6-4 and 10-8.

First girl—Professor Kellicott has a "stiff" down cellar.

Second girl—What a live one?

Third girl—What's a "stiff"?

Miss Merrill attended the wedding of a friend in Louisville, Ky., last week.

Mrs. Liggett has returned to college and will continue her work in modern languages.

Miss Christine Huston, '92, is visiting friends in Chicago.

The Inductive-Bible Class, under the leadership of Prof. Smith, met Sunday afternoon with fifteen members. The gospel of Luke was decided upon as the subject for study. All who can conveniently attend, and who wish to study the subject, are invited to join the class.

Every student will want a directory. They will be issued this week, containing the home and city address of every student in college. The thanks of the association are due Mr. R. S. Blinn for the earnest and successful soliciting that he has done in bringing out the present issue. Nineteenth of the advertising that will appear on its pages were secured by Mr. Blinn.

A recent number of the *Review of Reviews* contains an article entitled "A Greek Play on the Prairies," from which the following is taken: "A score or more of Ohio colleges about which disparaging remarks have sometimes been made, could show most abundant justification for their existence by pointing to the great number of strong and earnest men who have gone from their halls to fill honored places in life. Attention has been recently directed to the remarkable number of men distinguished in public affairs who have graduated from "Old Miami" at Oxford, O. Among them being the present Republican candidates for the presidency and vice presidency, and "two or three members of Mr. Harrison's cabinet."

The students that come to us from other colleges asking about our exchange table. We should have such a table by all means. Let everybody enjoy the exchanges.

Amateur photography is becoming more popular every year with our students. Mr. S. E. Burke has just developed a splendid set of pictures that he secured the past summer in and about Denver, Colo.

Mr. C. A. Lude was called to his home at Woodsfield on Friday on account of the serious illness of his mother.

Messrs. Landis, Moore, Lindsey and Burke wheeled to Westerville on Saturday and witnessed the game of foot ball between the Otterbein and Kenyon clubs. The score stood 18 to 12 in favor of Kenyon.

One would hardly suppose that the number of spinsters in a community would bear any relation to the yield of clover seed, but this is the way Prof. Kellerman explains it: "Cats, which are the special property of maiden ladies, destroy field mice, which are the natural enemies of bumble bees, which effect the fertilization of clover." Practical deduction for the benefit of the farmers of the State: "Build a small tenement house at each corner of your clover field and advertise them rent free to spinsters."

Miss Latham will soon begin a class in Physical Culture for young ladies, which will meet in the new gymnasium in the Electrical laboratory once a week. Her class last year was very successful, and a source of great benefit to all who were in it. Miss Latham's terms are very reasonable, and every one who can should take advantage of this opportunity.

There are several hundred volumes of bound numbers of scientific journals in the State Library which could be put to no better use than by placing them at the disposal of O. S. U. students. A movement to secure this privilege should be started.

Forty-five candidates presented themselves at the contest for positions on the Harvard University Glee Club.

Columbia College opened its doors October 3, and according to custom, Pres. Low admonished the "Sophs." and "Freshmen" to refrain from their customary rushing.

President Low told them that Yale and Cornell, and he might have added Michigan, had abandoned the rough custom.

Notwithstanding the request of the president, the rival classes met and a rush ensued which resulted in many bruises and torn clothes. After a short struggle the Freshmen came off the field victorious.—Ex.

Columbia College has opened at the old stand. No plans for changing the location to Bloomingdale Heights have yet been considered.

The Wooster Voice is the fourth Ohio College paper to change its form to one similar to WAHOO within the present year.

Chicago University took twenty-five professors and fellows from Johns Hopkins, and consequently a number of J. H. U. students go to Chicago this year.

At Harvard, arrangements have been made so that a student can receive the degree of A. B. in three years at college and in 304 South High Street, the fourth can accomplish the instruction guaranteed. Special work necessary for A. M. reduction for students.

"How d'ye come in?"

"Why I just stepped in and found that "Gov. Frederick" is running the neatest and best shoe repair shop in Columbus at the corner of High and Euclid Ave., East Side."

"Glad to see you, anyhow."

A SEMI-WEEKLY NEWSPAPER.—SUCCESSOR TO THE WEEKLY LANTERN.—ESTABLISHED, 1879.

VOL. XIII.

OHIO STATE UNIVERSITY, NOVEMBER 8 1892.

No. 16.

WHAT DOES IT MEAN?

O. S. U.'S TERRIBLE DEFEAT OF DENISON LAST SATURDAY?

Why, this—That our Team shall March on to continued Triumphs, and Win the Pennant.

The Ohio State University football team won their second championship game over Denison Saturday. Although the playing was hard, persistent and exciting throughout, the score was entirely one-sided, being 89 to 0 in favor of the State University. The winners showed the happy results of their thorough and systematic training, their playing being marked by quick, united and pell-mell fighting, by sure tackling and masterly guarding. Denison, while being a heavier team, was woefully lacking in concerted effort, their blocking was miserable, while their only strong offensive point, that of trucking the line, was not used to any great effect. Their tackling, however, was generally good.

The game was marked by good, natural playing, the best of spirit being displayed on both sides. A delegation of not less than seventy-five O. S. U. students accompanied the visiting team, and their gentlemanly conduct was the cause of not a little favorable comment.

While Denison played hard and desperately, we was no match for O. S. U.'s well-trained team. She persistently bucked the line, but to no avail, since with clever generalship our gritty rushers repelled all their onslaughts by getting down on their hands and knees. This is a capital play, and even against a much heavier team any successful advances are impossible. Denison failed utterly to go around the ends. This was due, of course, to their inferior blocking and to our superior tackling, in which all our men won honors.

The most striking feature of O. S. U.'s playing, however, was her rapid, united team work, by which she could not only tear through Denison's line like a cyclone, but go around the ends for many yards. In all its plays the team moved like one man and with wonderful precision and effect. All this is due, of course, to the faithful, hard training through which Mr. Ryder has taken the team.

There were a lot of happy O. S. U. men at Denison when the game was ours. Manager Sears and Captain Ellis were beside themselves with joy, but none were more delighted than our coach. And why? Simply because he saw and knew then that the hard training of the men was telling; that his work and theirs had not been in vain. And right here we desire to say that no more faithful work was ever done than has been and is being done by Mr. Ryder. He not only has the regard and respect and loyalty of every player, but he has

already won the admiration of every loyal O. S. U. man.

We have no special criticisms to make upon the work of men last Saturday. Every man played well and nobly for the glory of the scarlet and grey, yet there is one thing that should be mentioned now and for the last time. It is this: There is entirely too much selfish desire on the part of the backs to take the ball when a touch down is in view. This is due of course to the belief that so many touch downs to the credit of a player is an indication of his worth and ability. There never was a more vain and foolish belief. No one man can carry the ball over the goal line; nor no two or three or four, but it takes the united work of eleven men, and because Gillen or Kennedy or Ernst or Genheimer or Without takes the ball for touch down it is no sign that they are star players of their team or that all the glory should be heaped upon them. In doing so they did no more than their duty—that what their different positions on the team made obligatory upon them and besides they could have done absolutely nothing unless Powell and Reed and Mathers and Walsh and Thompson and Griffith and Ellis had been doing their whole duty in the line—unless they had given them their steady assistance, and in doing that their glory is just as great as is that of those who carry the ball. Now let this matter lie understood once and for all. We trust that this will be reproof enough, but if their is another such spectacle as there was at Denison, where Haas was literally besieged by the backs to take the ball when a touch down seemed easy—then we shall give some one a sound drubbing.

The winning of this game means every thing for our team. It has brought confidence to every man, besides making clear the way to victory over Kenyon and Adelbert. It does seem now that O. S. U. should win the pennant. Let us think that thought and play with it in our hearts and we will win.

NOTES.

The O. S. U. delegation was a splendid one. Their constantly giving of the yell was a mighty slogan for our men.

Joe Walsh was unfortunately disabled during the first part of the first half. Joe is something of a "fine lad" when it comes to playing foot ball, and Zurfluh played the best game of his life in his splendid effort to fill the place.

It was in the second half, Gillen, Kennedy and Walsh were out. "Oh, Gee," said Gillen, "what will the team do now with all its brightening Irish out? Poor Dick is the only one left." And Richard was right there throughout, although he was several times badly hurt.

SPLENDID PROGRAMS.

WERE THOSE RENDERED BY THE SOCIETIES FRIDAY.

Horton Celebrates With Splendid Music and Alcyone Fills Her Hall in Spite of Bad Weather.

HORTON.

Last Friday was the evening set for a special Columbian program in Horton, but as some of the performers were unable to be present, the literary program was necessarily rather brief, though it certainly made up in quality what it lacked in quantity.

The debate was first in order. The question, Resolved, "That Strikes are Justifiable," was especially interesting at this time, when the friction between Capital and Labor has been so recently brought to public notice. Mr. H. R. Postle's speech on the affirmative of the question was logical and convincing, and that of Mr. G. V. Clum, on the negative, equally so.

The Society was very fortunate in regard to music last Friday evening and enjoyed two delightful vocal solos by Miss Nellie McKenzie. Miss McKenzie has a fine voice, and she certainly had, in Horton Society, a most appreciative audience.

One of the most finished productions presented this year was the Columbian oration by Mr. L. E. Andrews. It was notably original in thought, and that thought was presented in language fittingly beautiful. After an intermission spent in singing college songs, etc., the business meeting was held. The society recently received a fine portrait of the late Hon. Mr. Horton, for whom the Society was named. Mr. Horton was one of the first trustees of the University. The society naturally appreciates the gift highly. Upon motion, a vote of thanks was passed to Mrs. Horton, who so kindly remembered the Society.

ALCYONE.

Last Friday night was wet and blustery, but Alcyone rises superior to little things of that sort, and a very fair sized crowd had assembled when the literary exercises were introduced by instrumental music from the agile fingers of Fred Mathias. Mr. Walter Sears was first on the program, and in a somewhat informal but exceedingly enjoyable paper he gave a sketch of the career of Edgar W. Nye, and told how as a newspaper reporter, he once interviewed the noted humorist. Mr. Sears was followed by Mr. Junk, who proclaimed in a creditable manner, Tennyson's Lady Clare. The

President exercised his prerogative and elicited brief speeches from Messrs. Sater, Surface, Doney and Myers, and after more piano music from Mr. Graves, the regular debate took place. The question was, "Resolved—That class rushes should not be abolished," and was sup-

ported on the affirmative by Logan and Boggess, on the negative by Strader and Mathias. The question was discussed with a good deal of animation and resulted in a victory for the negative. In the business session Mr. Charles T. Herbert united with the society.

BROWNING.

The unusually large number of girls who gathered in Browning Hall Friday afternoon were well repaid. The regular program had been postponed and after an excellent piano solo by Etta Weber, the hour was occupied by Miss Latham with a talk on Physical Culture. Having been a college girl herself, and understanding their condition and needs, Miss Latham was thoroughly at home with her audience and so was at her best. Her talk was full of interest and inspiration. Her words could not fail to impress everyone more fully with the nobility of life, and of active, unselfish living. She dwelt particularly upon the one-sided development of college women, that lack of harmony brought about by the predominance of head-work which has its outward effect in keeping the body out of its normal attitude. She emphasized the importance and necessity of correcting these defects and pointed out the benefits to be gained by the study of Physical Culture from the three standpoints of health, aesthetic development and expression.

Miss Latham had intended to give a reading after her lecture, but, owing to the lateness of the hour, recited two short selections instead and promised to come again soon and read. All will then be welcome to come and hear her. Those who were present Friday will not need a second invitation.

Miss Latham has consented to take a class in Physical Culture on the same terms that she offered last year, namely, twenty lessons for five dollars, on condition that a class of twenty be formed. The class will meet once a week in the Gymnasium. All who were in the class last year can testify to Miss Latham's excellence as a teacher and to the practical benefit to be derived from the lessons. It is hoped that a large number will avail themselves of this privilege. Hand your name at once to Miss Charlotte Claypoole or to Louise Herrick.

Bricks made of Plaster of Paris and cork are now used in the construction of powder mills. In case of explosion they offer slight resistance and are blown atoms.

The College Fraternity is the title of a new magazine that has reached us. It promises to become highly successful if the initial number is a fair sample of what is to follow. It tells the doings of all the fraternities in the country.

IT IS A GO.

A POLITICAL SCIENCE CLUB ORGANIZED.

The Students Met at Prof. Knight's and Mr. Siebert Reads an Excellent Paper.

The Political Science Association held its first meeting on Wednesday evening at Prof. Knight's. The profitableness of a society here for the purpose of discussing the current, social and economic questions of the day has long been recognized. All the attempts that have been made heretofore, towards organizing such a club have been unsuccessful. Since the beginning of the present college year the efforts made with this end in view have been most earnest and untiring on the part of a few determined spirits, and success has at last crowned their efforts.

These promoters of the organization, having drawn up a plan by which they hoped to conduct the affair, requested all those who had signified their intentions to become members to meet on Wednesday evening to consider and to act upon their report.

Prof. Knight, who has in every way encouraged the plan, very kindly invited the company to meet at his house for this work. Accordingly eighteen persons gathered at the Professor's at the above mentioned time and the report of the committee was heard and approved with but few changes. The permanent organization was then made and the following were the officers elected for the coming year: Pres., G. V. Clum; Vice Pres., L. Pugh; Financial Sec'y., L. F. Sater. These three, with Miss Herrick and Prof. Knight, will compose the executive committee.

Prof. Siebert had prepared for the occasion a most excellent paper upon "The Underground Railroad," the reading and discussion of which occupied the remainder of the evening. Prof. S. has made the subject one of special investigation and study and the masterly manner in which he presented the matter shows how thoroughly his work has been done. He took up in turn and explained in a very interesting way what the Underground Railroad was, where and by whom it was operated, in Ohio particularly, and how far its workings influenced the final overthrow of the Slave Power. Additional interest was added to the paper by a collection of original letters bearing upon the operations and of photographs showing several of the stations, the conductors and the passengers of the celebrated route. Among the many liberty loving and philanthropic people of Ohio who took a prominent part in these secret operations was our Prof. Townsend. He was a student at Cincinnati in the early days of the movement and rendered valuable assistance to the cause.

Considering the high character of Prof. S.'s paper and the entertaining discussion that followed, and the fact that a constitution was adopted and the permanent organization effected and the whole affair started off so promisingly at the very first meeting, it is assured that the work done this year will be highly profitable and interesting to all. The next meeting will be held on the evening of the 16th. Mr. Clum will have a paper for that time on the Michigan Electoral System.

EXCHANGE TABLE.

Every student should cultivate an interest in other colleges and should not confine himself exclusively to his own. He should learn that the walls and campus of his Alma Mater do not bound the college world, but that beyond it are institutions equally great and even greater. An excellent way of keeping in touch with them is by reading their periodicals sent to us as exchanges. This will give the student an opportunity to compare the various colleges and universities, will give him a knowledge of their inner life and nature, of their professors, their systems of training and education. He will also be able to form a more correct judgment or estimate of their rank and standing. The WAHOO receives exchanges from almost every college in Ohio and from many sources outside the State, and in addition to the instruction and entertainment furnished by the WAHOO it is desired to put these exchanges at the disposal of the student. This has not been done in the past because no suitable place was found for them. A place in the library should be given for this purpose as soon as there is any room to dispose of.

In many libraries an exchange table is one of the most interesting features. This would not fail to be the case should we have one. The members of the literary societies who support the WAHOO would be glad of an opportunity to compare it with other college papers. It is sincerely hoped that an exchange table will soon find its way into our library.

The system of making lock boxes and placing them in the cloak room ought to be condemned. It has come to such a place now that in order to have places to put their books, to hang their coats students have to go to the third and fourth floors and even now the third floor has been pillaged and all the hooks taken so that there is no place but the fourth floor. By whose authority are these boxes put up? It is certainly not by the authority of the President or Faculty. To help a few, it deprives a great body of students of a place to hang their hats and coats. The few may argue that

their books are stolen and that is the reason they put these boxes there. Generally if there are any books stolen it can be traced to the fault of the owner who leaves their books lying around anywhere.

Never before in the history of the University were there so many of these and they ought to be taken out because it deprives a great many of a necessity. Will the proper authorities look into this matter before it goes any farther?

The melancholy days are upon us with their rain and their mud. Unless the season is very different from most of the winter seasons that we have known, we must expect for a good portion of the time more or less (the chances are for more) of mud for the next four months. With all the ditching and surveying that is being done on the campus, the idea of pavements must not be forgotten. Some improvements are as necessary above ground as underground. There is no walk to the Chemical Laboratory from the path leading to the Main Building from the President's house. In times of bad weather students arriving from High street must wade through the mud or walk around the "V" to get to the Chemical Laboratory. Just now, while the campus is torn up, and while the materials and the laborers are easy at hand, and before the bad weather sets in for the season, it seems proper that the work should be done.

THE OBERLIN GAME.

Fifty to zero in Oberlin's favor.

The tide of events has again changed and O. S. U. is driven before the Oberlin team as she in weeks past has driven Buchtel, Marietta and Denison. It was a touching sight to see a few of our regular braves, worn by the Denison games, assisted by many substitutes and without manager or captain to cheer them on, fighting nobly for the maintenance of their greatness.

It was unfortunate that we were compelled to play so strong a team under so unfavorable circumstances.

But as it was an exhibition and not a championship game that was lost, and as our second team offered greater resistance to these giants of the North than did Delaware's first, there is nothing serious to regret. Each individual player must determine for himself whether he considers the results of the present Presidential campaign or of the yesterday's foot ball game of the most importance, and the justice of that decision is to be determined by the authorities of the association and not by us.

Miss Alice Beach, '91, who is ching in the High School at bana, attended the meeting of the Central Ohio Teachers' Association last week. She visited University Friday afternoon.

Miss Jessie Glotfelter visited her sister, Miss Martha Glotfelter, last week.

Misses Blackiston and Wirth attended the meeting of the Teachers' Association, Friday afternoon.

A number of teachers visited University Friday.

Misses Hoel and Glotfelter entertained their friends Thursday afternoon, November 8, with a ssian Tea.

Mr. Kissell, a Beta from Wittenberg, was at the chapter house Friday.

In a recent number of the world's Fair Advocate, published at Chicago, appeared a cut of University Hall and a description of our facilities and mode of work. The most recent statistics are given.

Buy a directory—every student needs one.

Grover Cleveland is a Sigma; President Harrison and Alai Stevenson are Phi Deltas; Whitelaw Reid is a D K E; General Weaver is Farmers' Alliance.

Judge Pugh is teaching a class Bible study at King Avenue E. Church.

Many of the teachers attending the meeting of the Central Ohio Association visited the University on Friday and Saturday.

Geo. W. Bope has been compelled to leave college on account of sickness. It was thought he had the typhoid fever.

H. R. Postle and E. W. Stull went Sunday at Franklinville's near Camp Chase.

There were about seventy students went to Granville to yell the O. S. U.

The taking down of the hooks in the cloak-rooms and putting lockers can no longer be endured. The accommodation of the few at the inconvenience of the many will not be suffered by American citizens without complaint, and certainly not by the S. U. student.

Ninety-five and '96 have received their share of newspaper mention for the past few days, but there is a whole book written out '98.

The essays and intrigues in the Master Piece Course are now being read and discussed.

The Adelbert-Kenyon game played Saturday was 20 to 12 in favor of Kenyon. That between Berlin and Delaware was 56 to 50 in Oberlin's favor.

K. F. Postle visited a literary society, a few miles out in the country, Saturday evening. On being called to the stage, he showed them what an O. S. U. boy can do.

The class in the Masterpiece course began reading their essays Monday. Those who are in leisure would do well to visit the class.

On last Tuesday evening the Horton foot-ball men were excused from Society during the rest of the foot-ball season, in order that they may have more time to devote to practice and yet keep abreast with their college work.

The merits of the new system of excuse cards adopted at the President's office, have been severely tested during the last few days by the great number of students being excused to vote, and have proved to be the most satisfactory system ever used.

It was remarked by one of our visitors at chapel last Friday, that we ought to have better music there; that with such a body of students and such splendid opportunities as the room affords, our singing should be one of the most inspiring features of the day's program. Why not make it so?

Why did all the girls desert the gab room Friday afternoon?

While waiting for the opening of Browning Friday evening, several of the young ladies passed the time in making taffy, which they pulled to their entire satisfaction and then bestowed upon the hungry multitude.

The preparatory students did not play foot-ball Saturday, because some of the men went to Denison. This is to be commended, as it shows that our younger students are developing from the very start a college spirit that takes precedence of class spirit.

The Central Ohio Teachers' Association was held in this city Friday and Saturday. It was largely attended by the teachers of Central Ohio, and many excellent addresses were delivered. Quite a number of students who have been teachers attended the meetings.

Rufus Alspach, Superintendent of Schools at Alpha, O., visited G. V. Clum Friday.

To the Editor:

Class spirit should always be subordinated to college spirit. If it seem necessary at any time in order to show proper class spirit, to break into the college tower, to take practical possession of a college building, and to trample under foot all regulations, written or unwritten, made for the preservation of college order, then it seems that the good name of the University has been imperilled for the very doubtful advantage of a part. That is, class spirit has triumphed over college spirit.

We say a good deal about our love for the University. Let us see to it that this be a zealous love, repudiating as a stain any action which may injure her reputation in the eyes of the public.

Perhaps a good way to prevent the recurrence of that particular form of disorder which invaded the upper floors of University hall last Wednesday would be to have the National flag always displayed upon the college tower. Two flags should be provided—one for "every day" use and one for holidays and special occasions. Then, as General Dix said, "If any one attempts to haul down the American flag"—but no one would. BIOLOGICAL CLUB.

The Biological Club held its regular bi-weekly meeting Tuesday, November 1, in the lecture-room of the Botanical building. Being the first regular meeting in November, it was the time for the annual election of officers, and the following were elected for the ensuing year: President, Mr. A. D. Selby; Vice President, Mr. J. H. McGregor; Secretary and Treasurer, Mr. Wm. Werner. Professor Hunt and Kellerman were elected members of the Executive Committee, which consists of the three officers and two other members chosen by the Club.

Professor Kellerman delivered an address on "The Biography of the Flora of Ohio." The earliest work on Ohio Flora was written in 1815 by Daniel Drake. Books on the subject have been produced at intervals ever since, some of the later ones by persons connected with this University. Mr. J. H. McGregor read a summary of an article on "The Comparative Physiology of Respiration," by Professor Gage, of Cornell. Mr. Wm. Werner gave a brief talk on abnormal growths found on the bark of the apple tree. There were several reports of personal work and observation by members. Seven new members were elected, making the membership larger than ever before. Doubtless there are many students in the University who would enjoy attending the meetings of the club. All persons interested in general Biology, Zoology, Physiology, Botany or Geology are invited to attend the meetings. The time of meeting has been changed to 6:30 p. m. and the time of adjournment will be 8:30. The next meeting will be held Tuesday, November 15th.

OUR WATERLOO.

PROVED THE BATTLE OF OUR TEAM WITH ADELBERT.
Much Poor Playing on Our Part, With Much Good Playing on Cleveland's Gives the Victory to the Enemy.

Our foot-ball team has met its Waterloo; Adelbert was the Iron Duke who crushed out Napoleonic hopes of universal dominion. The battle was won fairly and squarely, and O. S. U.'s defeat is unqualified and beyond appeal, but not beyond regret.

It was a pretty and honorable battle, although the day was cold and stormy. As the two teams lined up it could be seen that Adelbert had the best of it in weight both as to the line and to the hooks, especially the latter. The teams played as follows:

ADELBERT.	Positions.	O. S. U.
Girling	Left End	Ellis, Captain
Kieschard	Left Tackle	Zurich
Husbands	Left Guard	Reed
Mathes	Center	Powell
Taylor	Right Guard	Mathers
Stephens	Right Tackle	Thompson
Stewart	Right End	Griffith
Nesbitt, Captain	Quarter	Haas
Stockwell	Half Back	Gillen
Jones	Half Back	Kennedy
Evans	Full Back	Withoft
Barrows	Sub	Ernst
Smith	Sub	Gehheimer
Kaess	Sub	Morrey
	Sub	Dundap
	Sub	Magic

The first half was the brilliant part of the contest. It was close and exciting throughout, and at the end the score stood 20 to 18 in favor of the Adelberts. The chances for victory were even then, with the favors for O. S. U., and this was because she had played such a splendid offensive game and a good defensive one. But the second half was to tell a different story. Adelbert left off her tactics of bucking the line and sent her big men around the ends, and this she did magnificently; her blocking being even superior to that of Oberlin and much better than it was last year; we know that it was in this that she won from us then. Against this strong point, so admirably used, O. S. U. was powerless. Like a whirlwind Adelbert would come around the ends, four and five men abreast, and down the field she would go like mad—and O. S. U.! poor O. S. U.!—she could do nothing. But why could not O. S. U. get through the line or the blockers and bring down the runners as she did time and time again with Oberlin, and with every team she has played with this season? We answer, she could not. She failed utterly in the very point where she has always been so strong, and for which she has won the praise of Ohio's strongest team. It may sound strange, but it is true that Haas, Ellis, Withoft, Mathers and Thompson, who have repeatedly won honorable mention for brilliant tackling, accomplished comparatively nothing in that direction. Thus, it was, that O. S. U.'s weak and ineffective defensive play gave the victory so completely to Adelbert. The Clevelander's defensive play was also weak, it is

(Continued on 3d page)

Thoroughly in Earnest

IS THE OHIO SOCIETY FOR THE EXTENSION OF UNIVERSITY TEACHING.

Its Board of Councillors Meets in Columbus and Inaugurates Several Important Movements—Prof. Chalmers Represents the University.

With some additions the following is taken from the *State Journal*:

The board of councillors of the Ohio Society for the Extension of University Teaching met at Park hotel last Friday. All of the fourteen different Colleges and Universities in the society were represented, as follows: Professor Boughton of Ohio University, President Sterling of Kenyon College, Professor Hochdoefer of Wittenberg College, President Purinton of Denison University, Professor Phillips of Marietta College, Professor Root of Oberlin College, Professor Austin of Ohio Wesleyan University, President Sanders of Oberlein University, Professor Egbert of Buchtel College, Professor Hubbell of Antioch College, Professor Chalmers of Ohio State University, Professor Bancroft of Hiram College, Professor Stubbs of Baldwin University, Professor Merrill of Miami University.

The council deliberated until nearly midnight as to the best method of carrying on the work of university extension of Ohio.

A motion was carried unanimously that the society place a permanent organizer in the field who is to give all of his time under the direction of the board to the work of organizing the state and a committee was appointed to find and recommend to the board a suitable person for this office. Professor Chalmers was appointed chairman of this committee, the other members being Professors Hall of Oberlin College, Boughton of Ohio University, and Hubbard of Antioch College.

It was ordered by the board that a monthly paper be published as the organ of the Ohio Society; that this paper be the medium of communication between the society and the different colleges of the state, the school superintendents and general public.

The society is incorporated under the laws of the state and under its constitution must have nine trustees in whom its property interests must be vested.

The board elected the following trustees: For a term of three years—Dr. Washington Gladden, Columbus; ex-President R. B. Hayes, Fremont; Senator Calvin Brice, Lima.

Two years—D. S. Gray, Columbus; William Bowler, Cleveland; E. M. Thresher, Dayton.

One year—John G. Deshler, Columbus; Professor G. C. F. Southworth, Salem; Judge M. M. Granger, Zanesville.

Ray Layton was called home by the death of his grandfather, at Wapakoneta.

'97'S RECEPTION.

BROWNING'S MUSEUM.

IT PROVES A GREAT SUCCESS AS A UNIQUE ENTERTAINMENT.

But it Does Not Equal as Large a Harvest as was Hoped. It was Given, However, in a Worthy Cause and that is Consolation.

Browning's entertainment at Dr. Scott's last Friday evening was a huge success as a merry-making affair. It fairly sparkled with the originality for which the Society is famous. As a financial adventure, however, the net proceeds might have been larger.

The affair was sort of a two ring circus. There was a dime museum, quite full of all possible freaks and there was a gypsy camp, of which the raven-haired and piercing-eyed fortune-teller was the principal attraction. In the museum Miss Kaiser was the "Mrs. Tom Thumb"; Miss Rickey was the "Female Giant"; Miss Smith, "The Electrical Woman"; Miss Needles, "The Glass Eater"; Miss Claypool, "The Snake Charmer"; and Misses Krum, Bell, Ingram, Fisher and Voiles, "The Long-haired Sisters. Mr. Herb. Scott was the polished and wordy lecturer, who really did himself great credit by the way he handled his delicate subjects.

In the gypsy game there was Miss Morehart, "The Fortune Teller"; Miss L. L. the Flower Girl," and Miss Burr, "The Witch." This made a remarkably romantic trio, and the large crowds they drew attests their charming qualities as the "wild children of nature."

Ices were served by deaf hands and all indulged.

The Faculty and student body were creditably represented, and had Browning charged more for his fun the proceeds would have been more generous. As it is, however, the Athletic Association will gladly take whatever it can get and with great gratitude, too, since her exchequer is in a deplorable shape.

Browning is to be commended for conducting this enterprise to a success at so opportune a time.

CORNED BEEF

Made several Students and a number of North End People Sick.

Last Friday the city papers

were full of an account of a wholesale poisoning that occurred near the University. Half a dozen

students who board at Murray's were among the victims. It seems that a large, fourteen pound can

of corned beef, of which portions

were sold to different people about

college, contained bacteria or

some poisonous substance. No

less than twenty ate of it on Thurs-

day evening for supper and before

midnight the doctors in the vicin-

ity had their hands full treating

the patients. Nearly all of them

thought death was nigh, as the

meat caused them to be fearfully

sick. The five students, it is

claimed, were the heartiest eaters

of the infected beef, and yet got

off most easily. But that is not

strange, for after boarding at col-

lege a while, the average student

finds that, like an ostrich, he is

able to eat almost anything with

impunity. However, this time,

the boys had to lay off, and some

of them go to bed a while.

Some of the bad beef, which,

to all intents and purposes, looked

and tasted like good corned beef,

was examined in the lab. by

"Tip" Lewis, who is of the

opinion that it contains *plomaines*.

It seems that *plomaines* are not

good to eat, and those students

who are being nourished on corn

beef for supper every evening

should be sure to pick the *plomaines*

out with a fork before par-

taking of the meat. Live bacteria

are almost as bad, and should

carefully be avoided. They are

apt to cause an epidemic. When-

ever food is discovered to be adul-

terated with *plomaines* or bac-

teria, it is better to refer the article

to Prof. Detmers, rather than

attempt to exterminate them with

a fork.

COLUMBUS HORTICULTURAL SOCIETY.

The regular monthly meeting of the Columbus Horticultural Society will be held in the Botanical Building, Ohio State University, Saturday, November 26, 1892, at 2:30 P. M. (sun time.)

An unusually interesting pro-

gram is offered, in addition to

reports of Committees.

PROGRAM.

Winter Crops.....By Prof. W. J. Green

Leaf Spots....By Prof. W. A. Kellerman

Prof. Green will show what winter grown crops must com-

pete with.

Prof. Kellerman will

exhibit specimens of affected

leaves, and present an account of

the various fungi which cause

them.

All are cordially invited. None

can afford to miss this meeting.

THE CONTEST.

In the majority of colleges the time set for holding the local or national contest is just approaching. In others, much to the advantage of the winner, the contest has been held. In some instances the winner of the local contest has six months preparation before the State contest. The result of such preparation is always manifest. The best orations of which we have any knowledge are those which have gradually matured within one or two years' time. An oration is somewhat like a plant. It may rapidly spring up into something beautiful and lasting under favorable circumstances. These would necessarily mean several days of uninterrupted labor on the oration. By concentrating all the energies upon it during this time, it may be completely transformed.

We, therefore, advise our contestants to take advantage of the coming short vacation. We have thus far made an honorable record, but the height of our ambition has by no means been attained. We must win new laurels. This depends very much on our present competitors. We place the greatest confidence in their ability, and do not expect to be disappointed. It remains for the proper efforts to be made.

VACATION.

Two very busy months of college work have again passed by, and a short vacation will be greeted very heartily. The degree of earnestness which characterizes the student varies to some extent. There are those who feel that only a small amount of effort will be necessary to gain the desired end; those by whom every moment is carefully guarded lest it vanish with nothing accomplished. The latter are placed under a constant strain, and the slightest relaxation is a benefit and even a necessity. Again, there are those who long for a vacation only to do the work which they before either neglected, or for which they found no time. In any case, a short vacation is extremely welcome. But when there is to be in addition the enjoyment of a turkey, of a good Thanksgiving dinner, vacation is more than anxiously awaited.

ON A STRIKE.

THE "GAB ROOM" IS DESERTED
TILL BETTER QUARTERS
ARE OFFERED.

It has been known for some time that the sanitary condition of the "girl's room" has not been of the healthiest. The construction of the viaduct down town shut off one of the water mains and so reduced the pressure that there has been no water in this part of the building for several days. The inconvenience and unpleasantness of the situation has been more than the girls could stand. They also say that the proximity of the rooms to the physiological lab. is not conducive to a pure atmosphere, and furthermore, the size of the rooms makes them too crowded when the 100 girls are all there. Friday a petition was presented to the faculty asking them to remedy the matter or the girls would not return Monday afternoon in case affairs were no better. Yesterday, the place was still intolerable, and at a mass meeting in the "gab room" it was decided to carry out the terms of the petition, and accordingly their fair faces were not to be seen in the afternoon.

President Scott told the committee that he thought they were justifiable in refusing to use the rooms, but he hoped that they could get along for the present. The Trustees have been considering for some time the matter of giving the girls a better lunch room, and this action of theirs will probably hasten the execution of the plan somewhat.

It is very unfortunate that the trouble was made the subject of a sensation by the daily papers as their influence in publishing the affair is sure to be prejudicial to the University. The matter should have been attended to long ago so that it would never have come to a critical point. A little timely plumbing would have enabled them to get water into the washroom from the large tank in the tower which is intended for such emergencies.

The School of Law.

Judge Abernethy has printed a list of thirty-one questions on Mortgages, covering part of the lectures delivered by him to the Senior class this year.

On Tuesday, November 29th, Mr. E. O. Randall, Professor in Contracts, will deliver an historical lecture entitled "The War of the Roses;" it will be held at the First Baptist Church, on the corner of Third and Rich streets, and will be under the auspices of the B. Y. P. U.

The Athenean Literary Society held its regular meeting last Friday evening, Nov. 18th, devoting its time to a discussion on the following subject:

Resolved, "That the telegraph and railroads should be placed under government control." Attention was directed to the legal questions involved as well as to the expediency of the proposed change. Messrs. Follin, McCarter and Weaver supported the affirmative and Messrs. Cartwright and Swinehart defended the negative.

A. A. GRAHAM,

93 West Eighth Avenue, Columbus, Ohio

(Continued from 1st page.)

his life and wine for himself a boasting reputation for a first class half back. Kennedy's superb tackling often saved our team from utter disgrace.

Powell played his usual game and this in spite of a very sore ear.

Mathers played well, but there was none of his fine tackling which has always been noticeable before.

Reed, however, played the best game of the season. His tackling was something remarkable.

Zurfluh always plays hard and faithfully, and is to be commended for it in a game where there was none to spare. His tackling was sure, but it didn't occur any great number of times.

Thompson won the admiration of all by the brilliant way in which he bucked the line. There is no one in the team who does it quite like he does, and certainly there is none who does it so effectively. His tackling, however, was not as good as common.

Griffith was not entirely in condition to play, having a very severe cold. His playing showed there was something the matter, at least. Tackling has always been a weak point with him. It was lamentably weak at Cleveland.

But there is one more game to play, and those men who did so poorly at Cleveland may redeem themselves if they will. The game with Kenyon must be won. This will tie for the pennant. The University expects the team to win it, and if the men will but play their usual hard, fierce, determined game the victory will be ours.

NOTES.

Gillan hurt his arm in the latter part of the game and Genheimer took his place, and made some fine tackles while he played. Had Genheimer played one of the ends, his good tackling might have kept the score somewhere within decency.

The Adelbert still maintain their reputation for courtesy and gentlemanly conduct. O. S. U. men think well of them.

Besides Manager Sears and Mr. Ryder, the following men accompanied the team: Messrs Lawrence, Burr, Cheney, Rogers, Martin of the Dormitory and Abbey.

Mr. Thompson, an old Williams man, an old friend of Mr. Ryder, represented the University as umpire and referee.

There is no doubt that Adelbert is the first team in the League, and the report that Kenyon robbed their game from them is not far from the truth. Kenyon has always had an unsavory reputation for mean and dishonest dealings, and the charge that Adelbert now makes against her is in keeping with a hundred others. In the face of this charge, Kenyon should have the honor to be willing to meet the Adelbert team again and thus settle once and for all the question of her superiority. It would also settle her claim for decency and fair play. O. S. U. always gracefully accepts an

honorable defeat, since she likes to see those win who deserve to, and those defeated to seek victory by none other than honorable means.

Locals and Personals

Dunham who is in school at Ann Arbor is spending the Thanksgiving vacation at home.

Messrs. Kramer and Black, of O. W. U., spent Saturday and Sunday here with Messrs. Moore and Covell.

Will Walker, of Troy, O., has been visiting his brother Harry.

R. E. Safford spent a few days at his home at Chillicothe last week.

Miss Scott, of Troy, visited the University on Friday.

"Bud" Alexander was called home last Thursday on account of the serious illness of his mother.

Miss Fannie Howard has been elected *Makio* editor for Kappa Gamma.

Mr. Ira Crawford, of the Law School was initiated into Beta Theta Pi, last Saturday night.

Messrs. Badgeman, O'Neil and Curtis of Denison University, visited the Betas on Saturday.

D. H. and F. M. Foster are wearing the pin and colors of Sigma Alpha Epsilon.

Saturday evening, Messrs. D. H. and F. M. Foster were initiated into the mysteries of Sigma Alpha Epsilon. The initiation took place at the Normandie where the banquet was also served. Mr. Weaver of the Law School was present.

Miss Norma Green was visited by her father last week.

The class of '97 has the honor of giving the first class reception of the year.

Not as many of the Y. M. C. A. members were present Sunday evening, as was hoped for. The old members seem most careless in this respect.

President Hayward is to be congratulated for his able exposition of the college Y. M. C. A. work.

The new course in English is gaining more favor as the real merits of the course are known.

There will be one issue of THE WAHOO this week.

The class of '97 held a class reception last evening at the home of Miss McLaughlin. The evening was delightfully spent in various games and dancing.

First Junior—"What is that book Prof. Smith always has with him in class?"

Second Junior—"Why, that's his pony (Jewett). You know he's getting old and rheumatic. Poor horse!"

A joint reception of the Y. M. C. A. and King's Daughter's has been arranged for, to be held in the city Y. M. C. A. parlors. Full details will be announced later.

The class in advanced economics have taken up the question of Free Trade and Protection. O. S. U. always gracefully accepts an
